Priority Five of our digital inclusion strategy aims to ensure that digital products services are designed for all, by being accessible and easy to use. Use this document to see what resources and tools you can use to help you design and assess your digital accessibility.

Accessibility assessment tools, standards and statements

ANDI	**ANDI - Accessibility Testing Tool - Install (ssa.gov)**: This free accessibility testing tool checks the accessibility of forms, images, headings, colour contract, data tables, links and more.
W3C® Web Accessibility Initiative WAI	**Home | Web Accessibility Initiative (WAI) | W3C**: Use this web resource to explore strategies, standards, and resources to make the Web accessible to people with different access needs.
Hemingway *Editor*	**Hemingway Editor (hemingwayapp.com)**: The free app helps make your writing clear by providing tips on how to minimise complex sentences and other errors. The tool can also suggest simpler words to ensure the language you use is readable for everybody.
DWP Digital	**Accessibility statements - DWP Accessibility Manual**: This link provides details on the law surrounding accessibility statements, along with useful templates for consideration.
AbilityNet	**A digital world accessible to all | AbilityNet**: AbilityNet provides a range of services: from supporting older people or disabled people looking for help with their technology, to helping digital professionals advocating for accessibility best practices within their organisations. AbilityNet also has a range of factsheets you can download for free, and has courses available to level-up your accessibility knowledge.
