101	Downhill Phase 1+2, Downhill	Sunderland North	REDHILL
104	Carley Hill School, Emsworth Road	Sunderland North	SOUTHWICK
120	St Hilda's Church, School and adjacent land	Sunderland North	SOUTHWICK
121	Newcastle Road Baths	Sunderland North	FULWELL
154A	Seaburn Camp, Whitburn Road (North)	Sunderland North	FULWELL
154B	Seaburn Camp, Whitburn Road (South)	Sunderland North	FULWELL
175	Fulwell Quarry East, land at Bell House Road	Sunderland North	SOUTHWICK
211	36 to 38 Roker Avenue	Sunderland North	ST PETERS
214	Land to the east of former Maplewood School, Redcar Road	Sunderland North	REDHILL
238	Portobello Lane, Roker Avenue	Sunderland North	ST PETERS
254	Fulwell Reservoir, Viewforth Terrace	Sunderland North	FULWELL
265	Beacon Drive, site at	Sunderland North	ST PETERS
301	Ferryboat Lane, land at	Sunderland North	CASTLE
398	Givens Street/Bede Street, Roker, land at	Sunderland North	ST PETERS
413	Seaburn Amusements, Whitburn Road	Sunderland North	FULWELL
416	Land North and West of Ferryboat Lane, North Hylton	Sunderland North	CASTLE
416B	Land at Ferryboat Lane, North Hylton	Sunderland North	CASTLE
439	Cricklewood Rd, land at	Sunderland North	CASTLE
467A	Upper Fulwell	Sunderland North	SOUTHWICK
467B	Thornbeck College site	Sunderland North	SOUTHWICK
467C	Thornbeck College, land to the North	Sunderland North	SOUTHWICK
517	Former Castletown Workmens Club, Castle View	Sunderland North	CASTLE
518	Former Mcees Club and land to the rear, Old Mill Road	Sunderland North	SOUTHWICK
520	Southwick Social Club, Church Bank	Sunderland North	SOUTHWICK
537	Land at Redcar Road/Rawdon Rd	Sunderland North	REDHILL
556	Land at Witherwack House	Sunderland North	REDHILL
563	Hylton Skills campus, north Hylton Road	Sunderland North	SOUTHWICK
565	Pheonix Tower Business Park, Castletown Way	Sunderland North	CASTLE
568	Fulwell Fire Station, Station Road	Sunderland North	FULWELL
572	Former Bishop Harland School, Downhill	Sunderland North	REDHILL
672	East of Witherwack / Fulwell Quarries	Sunderland North	SOUTHWICK
675	Land at Newcastle Road, Fulwell	Sunderland North	SOUTHWICK
687	Former Hylton Castle Library, Cranleigh Road	Sunderland North	CASTLE
693	Former Cheadle Centre, Caithness Road, Hylton	Sunderland North	CASTLE
708	Land fronting Chiswick Road	Sunderland North	CASTLE
710	Oswald Terrace South	Sunderland North	CASTLE
711	Kidderminster Road	Sunderland North	REDHILL
720	Land at Dixon Square, Causeway	Sunderland North	ST PETERS
722	Land to the east of Old Mill Road, Carley Hill	Sunderland North	SOUTHWICK

Glossary of Acronyms

- AHLV Area of High Landscape Value
- EA Environment Agency
- GI Green Infrastructure
- HLV High Landscape Value
- HRA Habitats Regulations Assessment
- LGS Local Geodiversity Site
- LLFA Lead Local Flood Authority
- LNR Local Nature Reserve
- LWS Local Wildlife Site
- NCB National Coal Board
- NWL Northumbrian Water Ltd
- PDL Previously Developed Land (ie. 'Brownfield' Land)
- S106 Section 106 Agreement
- SAM Scheduled Ancient Monument
- SSSI Site of Special Scientific Interest
- TPO Tree Preservation Order

SHLAA Ref No:	079	Site Name:	Hylton Lane/Blaydon Ave, Hylton Lane
Subarea:	Sunderland North		
Ward:	REDHILL		
PDL or greenfield:	Greenfield	Capacity:	71
Sieved site?	No	Site area (HA):	2.51
Included in Supply?	Yes	Deliverable/Developable:	1-5 years

Constraints

Site in close proximity to nearby designated AHLV and Downhill Old Quarry Wildlife Site and Local Geodiversity Site (about 300-350m away) within S Tyneside. Within 6km of coast, therefore subject to HRA. Northumbrian Water has raised issues with sewer capacity. Low incidence potential of groundwater flooding. Forms amenity greenspace and part of a GI corridor.

Planning History

Present Planning Status: Application pending
 Planning App No: 18/00527/FUL
 Student Accommodation: No
 Extra Care/Sheltered Accom (self contained units): No

Planning History 2

Completions 2015/16 until 2032/33 figures

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: Mitigation required. Site in close proximity to nearby designated AHLV and Downhill Old Quarry Wildlife Site and Local Geodiversity Site (about 300-350m away) within S Tyneside. Within 6km of coast, therefore subject to HRA. Northumbrian Water has raised issues with sewer capacity. Low incidence potential of groundwater flooding. Forms amenity greenspace and part of a GI corridor.

Availability:

Conclusion on Availability: Available

Comments on Availability: Gentoo owned site available for development.

Achievability:

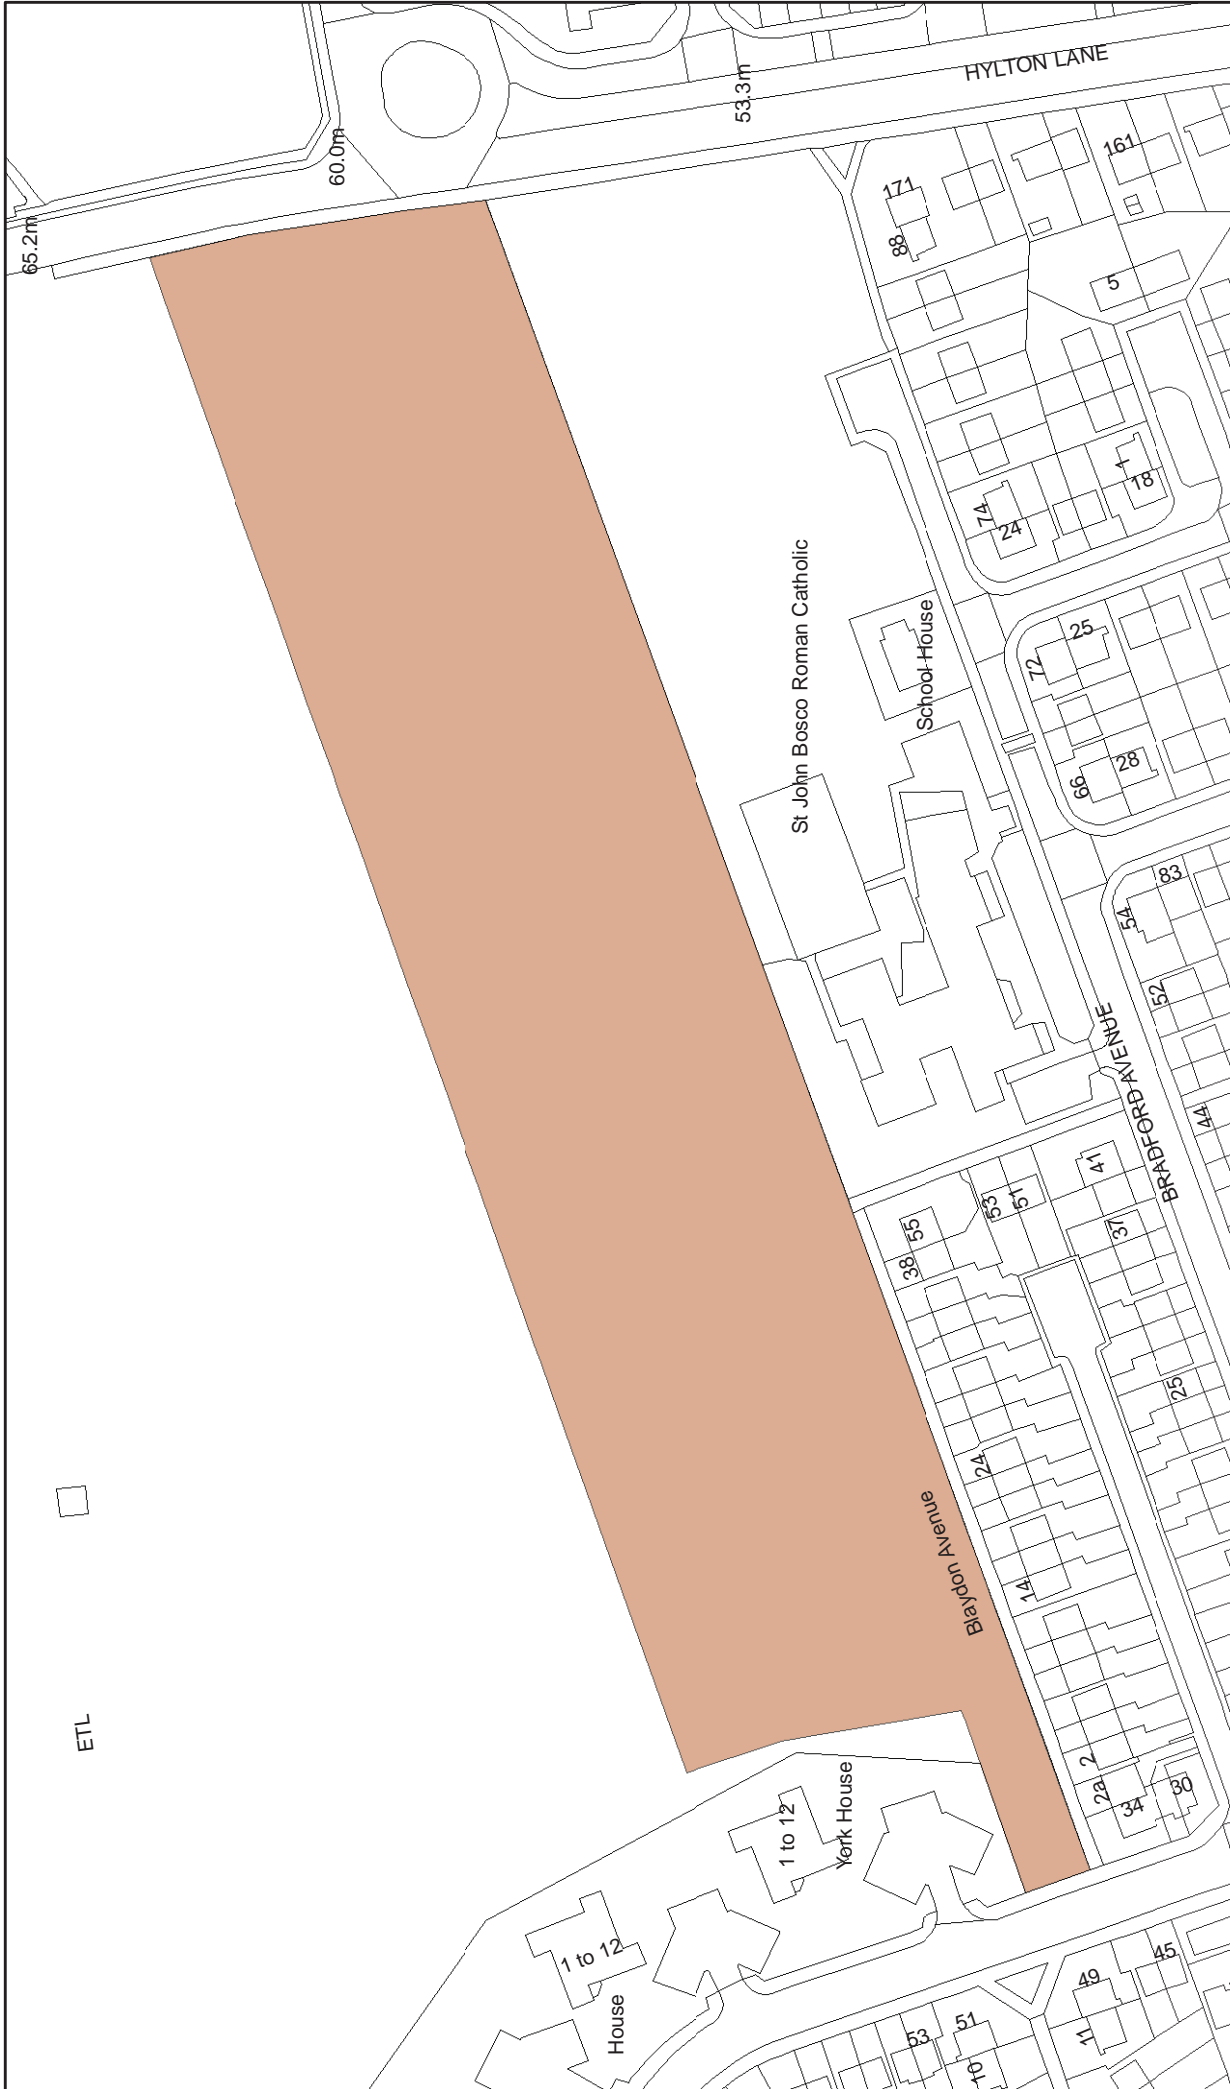

Conclusion on Achievability: Achievable

Comment on Achievability: Viability Assessment Typology: Large Greenfield 75.

Low to mid market value area, with steady rates of recent delivery and moderate developer interest. Average prices in immediate area. Site specific considerations (incidence on site of surface water flooding, buffer zone likely required due to proximity to AHLV and LWS, net developable area/yield may be reduced due to proximity to this designation).Gentoo have resolved drainage issues so not considered to impact upon the achievability fo the site. Design for site currently being progressed.

Deliverability

Comment on Deliverability: Further discussions with Gentoo have indicated that the main constraint to the site was NWL concerns with capacity, however Gentoo have had substantial discussions with both NWL and the LLFA and a solution has been reached, as such a planning application has now been submitted and is under consideration. First completions expected in year 5.

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: Site is adjacent to and within the setting of the grade II listed Holy Trinity Church - the eastern part of the site once formed the grounds of the church. Within 6km of coast, therefore subject to HRA. Part of site is subject to 1:30 incidence surface water flooding. Low incidence potential of groundwater flooding. Part of site includes amenity greenspace, which should be considered for retention and upgrading. Potential school capacity issues.

Availability:

Conclusion on Availability: Available

Comments on Availability: Council owned site identified for disposal. Developer interest in the site with a scheme being drawn up for consideration.

Achievability:

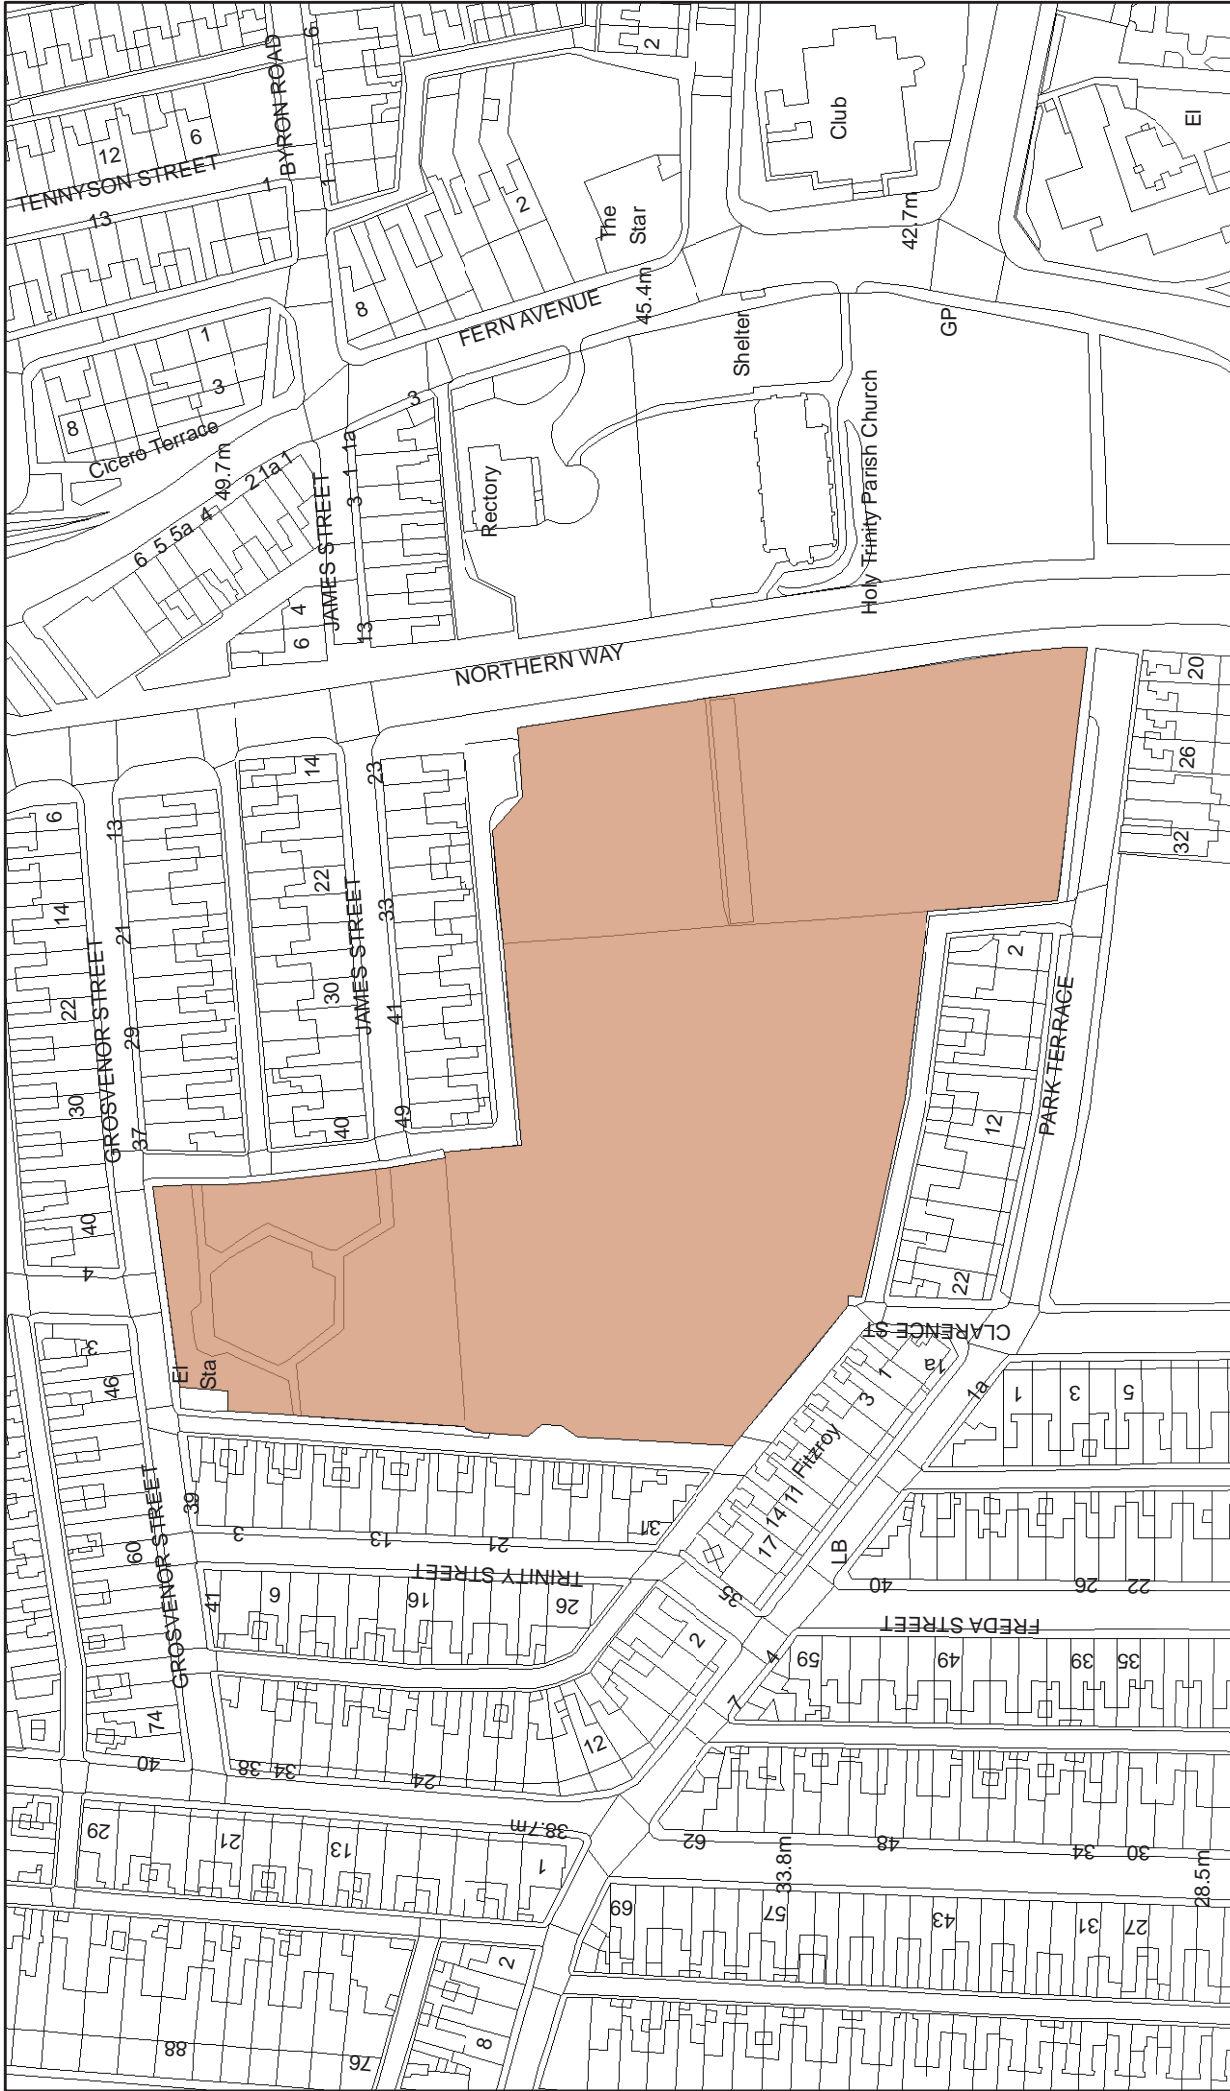

Conclusion on Achievability: Achievable

Comment on Achievability: Viability Assessment Typology: Medium Brownfield 25.

Council working with developer to draw up a feasible development scheme.

Deliverability

Comment on Deliverability: Council owned site identified for disposal. Current scheme being drafted by a developer for approximately 40 units. Detailed planning permission expected within 12 months, this site is deliverable and capable of delivering around 40 units at the back end of years 1-5.

Under Construction: No
 Units Completed: 0

Assessment Information

Suitability:

Conclusion on Suitability: Suitable
 Comments on Suitability: The site has previously had planning permission for 28 dwellings.

Availability:

Conclusion on Availability: Available
 Comments on Availability: No known constraints to availability at this point in time.

Achievability:

Conclusion on Achievability: Not Achievable
 Comment on Achievability: Viability Assessment Typology: Medium Brownfield 25.

Viability Assessment Typology indicates that this typology of site is unlikely to be viable due to associated costs of development on brownfield land, therefore the site has been identified as not achievable at this point in time. Lapsed permission indicates that there may be viability/achievability issues associated with bringing the site forward for development.

Deliverability

Comment on Deliverability: Viability Assessment Typology indicates that this typology of site is unlikely to be viable due to associated costs of development on brownfield land, therefore the site has been identified as not achievable at this point in time.

SHLAA Ref No:	154A	Site Name:	Seaburn Camp, Whitburn Road (North)
Subarea:	Sunderland North		
Ward:	FULWELL		
PDL or greenfield:	Greenfield	Capacity:	64
Sieved site?	No	Site area (HA):	4.00
Included in Supply?	Yes	Deliverable/Developable:	1-5 years

Constraints

Part of the coast - HLV. Also in close proximity to nearby designated AHLV within S Tyneside. Close proximity to coast, therefore subject to HRA. Would impact on priority species, especially wintering birds. Forms part of the coastal green infrastructure corridor and provides amenity greenspace. Within a Critical Drainage Area and is affected by 1:30 incidence surface water flooding. Low incidence potential of groundwater flooding. Local archaeological significance.

Planning History

 Units Completed: 0

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: Mitigation required. Part of the coast - HLV. Also in close proximity to nearby designated AHLV within S Tyneside. Close proximity to coast, therefore subject to HRA. Would impact on priority species, especially wintering birds. Forms part of the coastal green infrastructure corridor and provides amenity greenspace. Within a Critical Drainage Area and is affected by 1:30 incidence surface water flooding. Low incidence potential of groundwater flooding. Local archaeological significance.

Availability:

Conclusion on Availability: Available

Comments on Availability: University of Sunderland owned site have indicated that the site could be made available to come forward for 140 units.

Achievability:

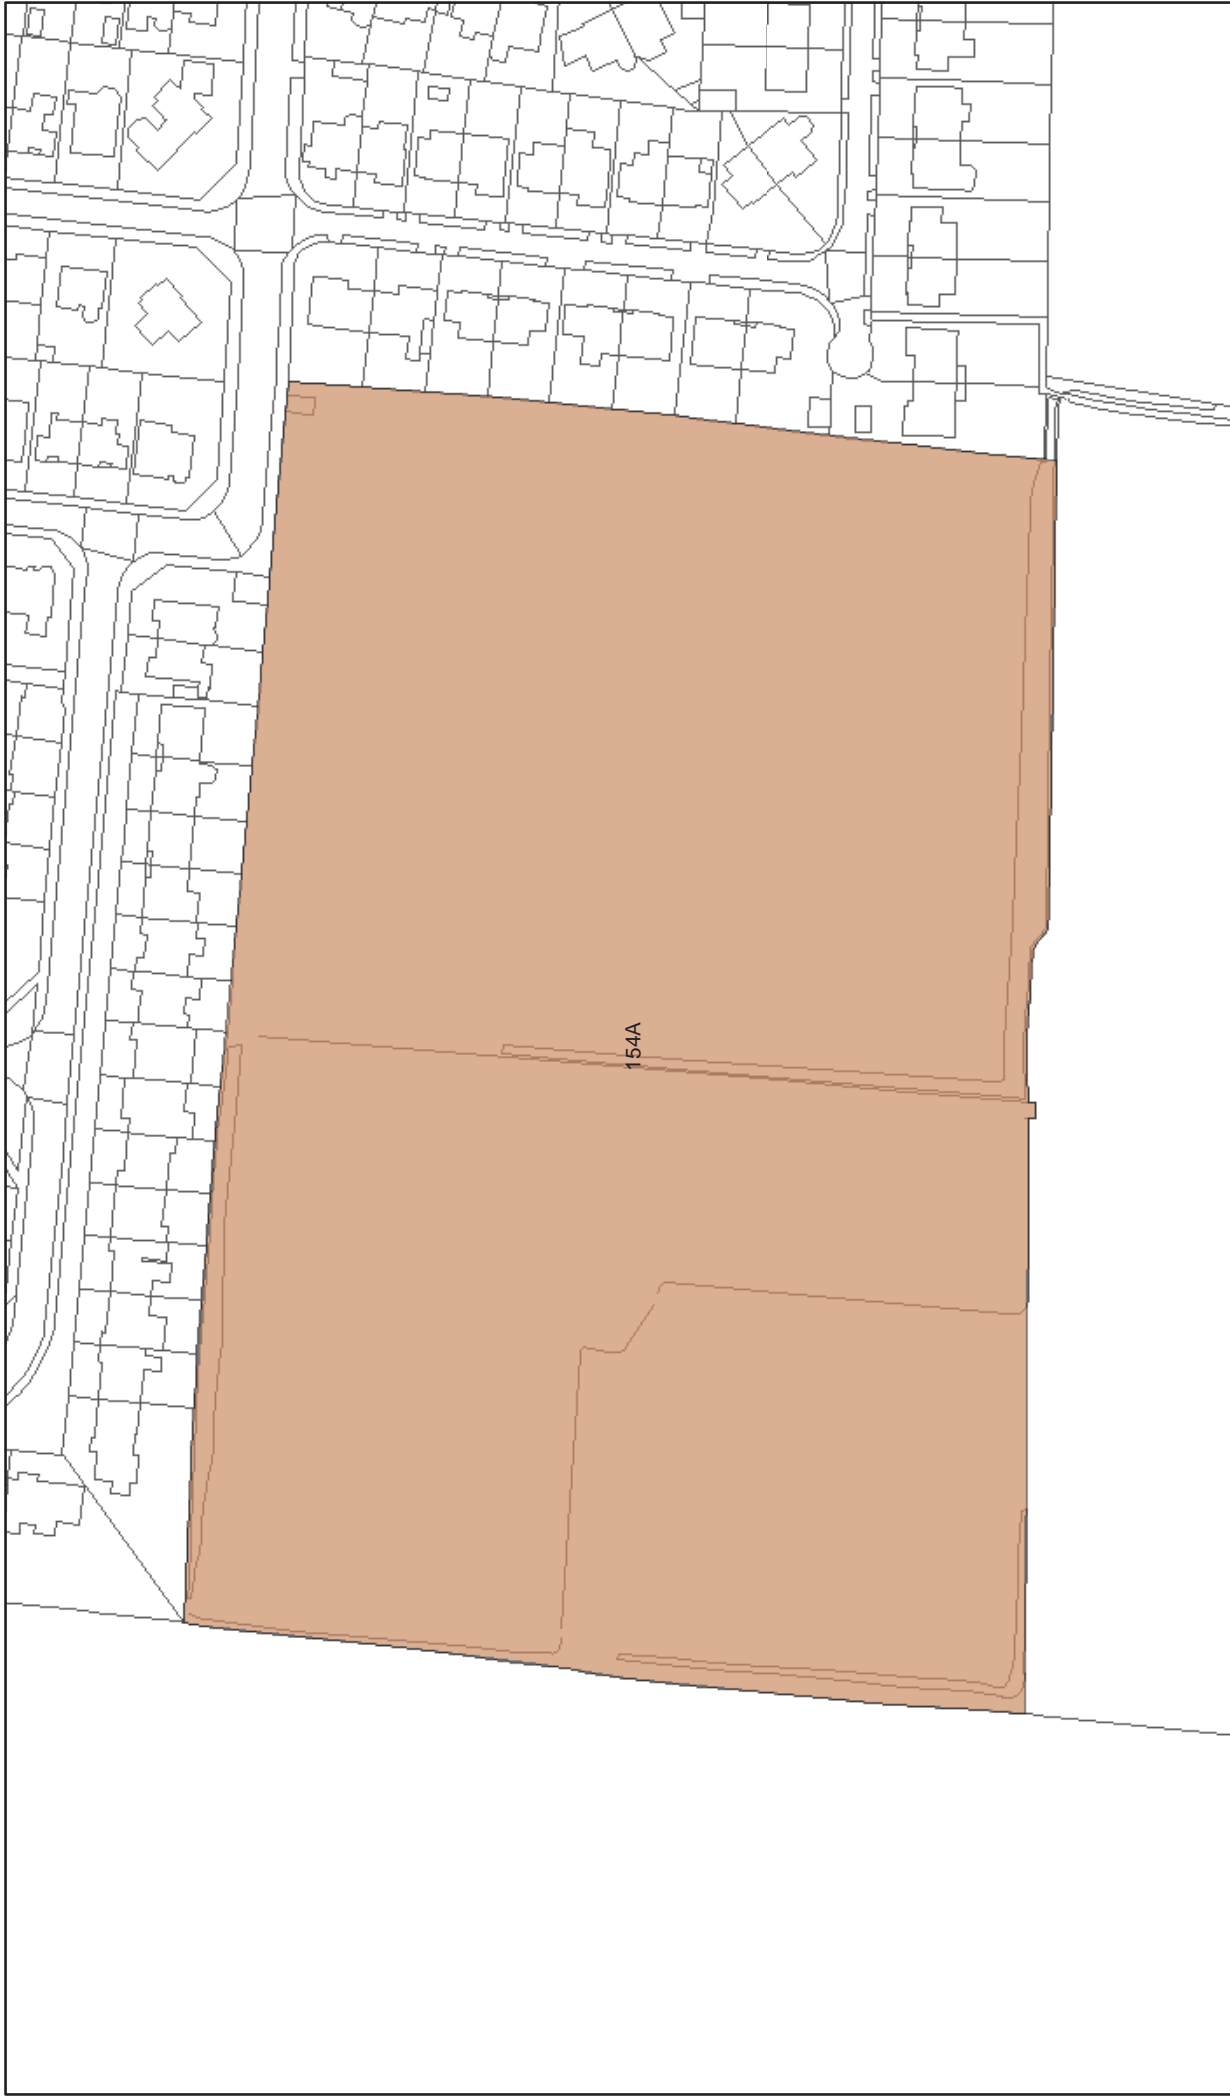

Conclusion on Achievability: Achievable

Comment on Achievability: Viability Assessment Typology: Large Greenfield 75.

Mid to high market value area, with steady rates of recent delivery and high developer interest. Above average prices in immediate area. Site specific considerations (incidence on site of surface water flooding, buffer zone likely required due to proximity to coastal AHLV, HRA, net developable area/yield may be reduced due to proximity to this designation and impact of priority species). Potential abnormal costs from surface water flooding could impact upon the viability of the site

Deliverability

Comment on Deliverability: Subject to suitable mitigation being provided due to the sites proximity to the coastal wildlife corridor, HRA being satisfied and mitigation for surface water flooding, the site has the potential to accommodate around 64 units. Planning application pending. Pre-application discussions have taken place.

Constraints

Part of the coast - HLV. Also in close proximity to nearby designated AHLV within S Tyneside. Close proximity to coast, therefore subject to HRA. Would impact on priority species, especially wintering birds. Forms part of the coastal green infrastructure corridor and provides amenity greenspace. Within a Critical Drainage Area and is affected by 1:30 incidence surface water flooding. Low incidence potential of groundwater flooding. Local archaeological significance.

Assessment Information

Suitability:

Conclusion on Suitability: Suitable
Comments on Suitability: Mitigation required. Part of the coast - HLV. Also in close proximity to nearby designated AHLV within S Tyneside. Close proximity to coast, therefore subject to HRA. Would impact on priority species, especially wintering birds. Forms part of the coastal green infrastructure corridor and provides amenity greenspace. Within a Critical Drainage Area and is affected by 1:30 incidence surface water flooding. Low incidence potential of groundwater flooding. Local archaeological significance. School capacity issues.

Availability:

Conclusion on Availability: Available
Comments on Availability: Council owned site identified for disposal.

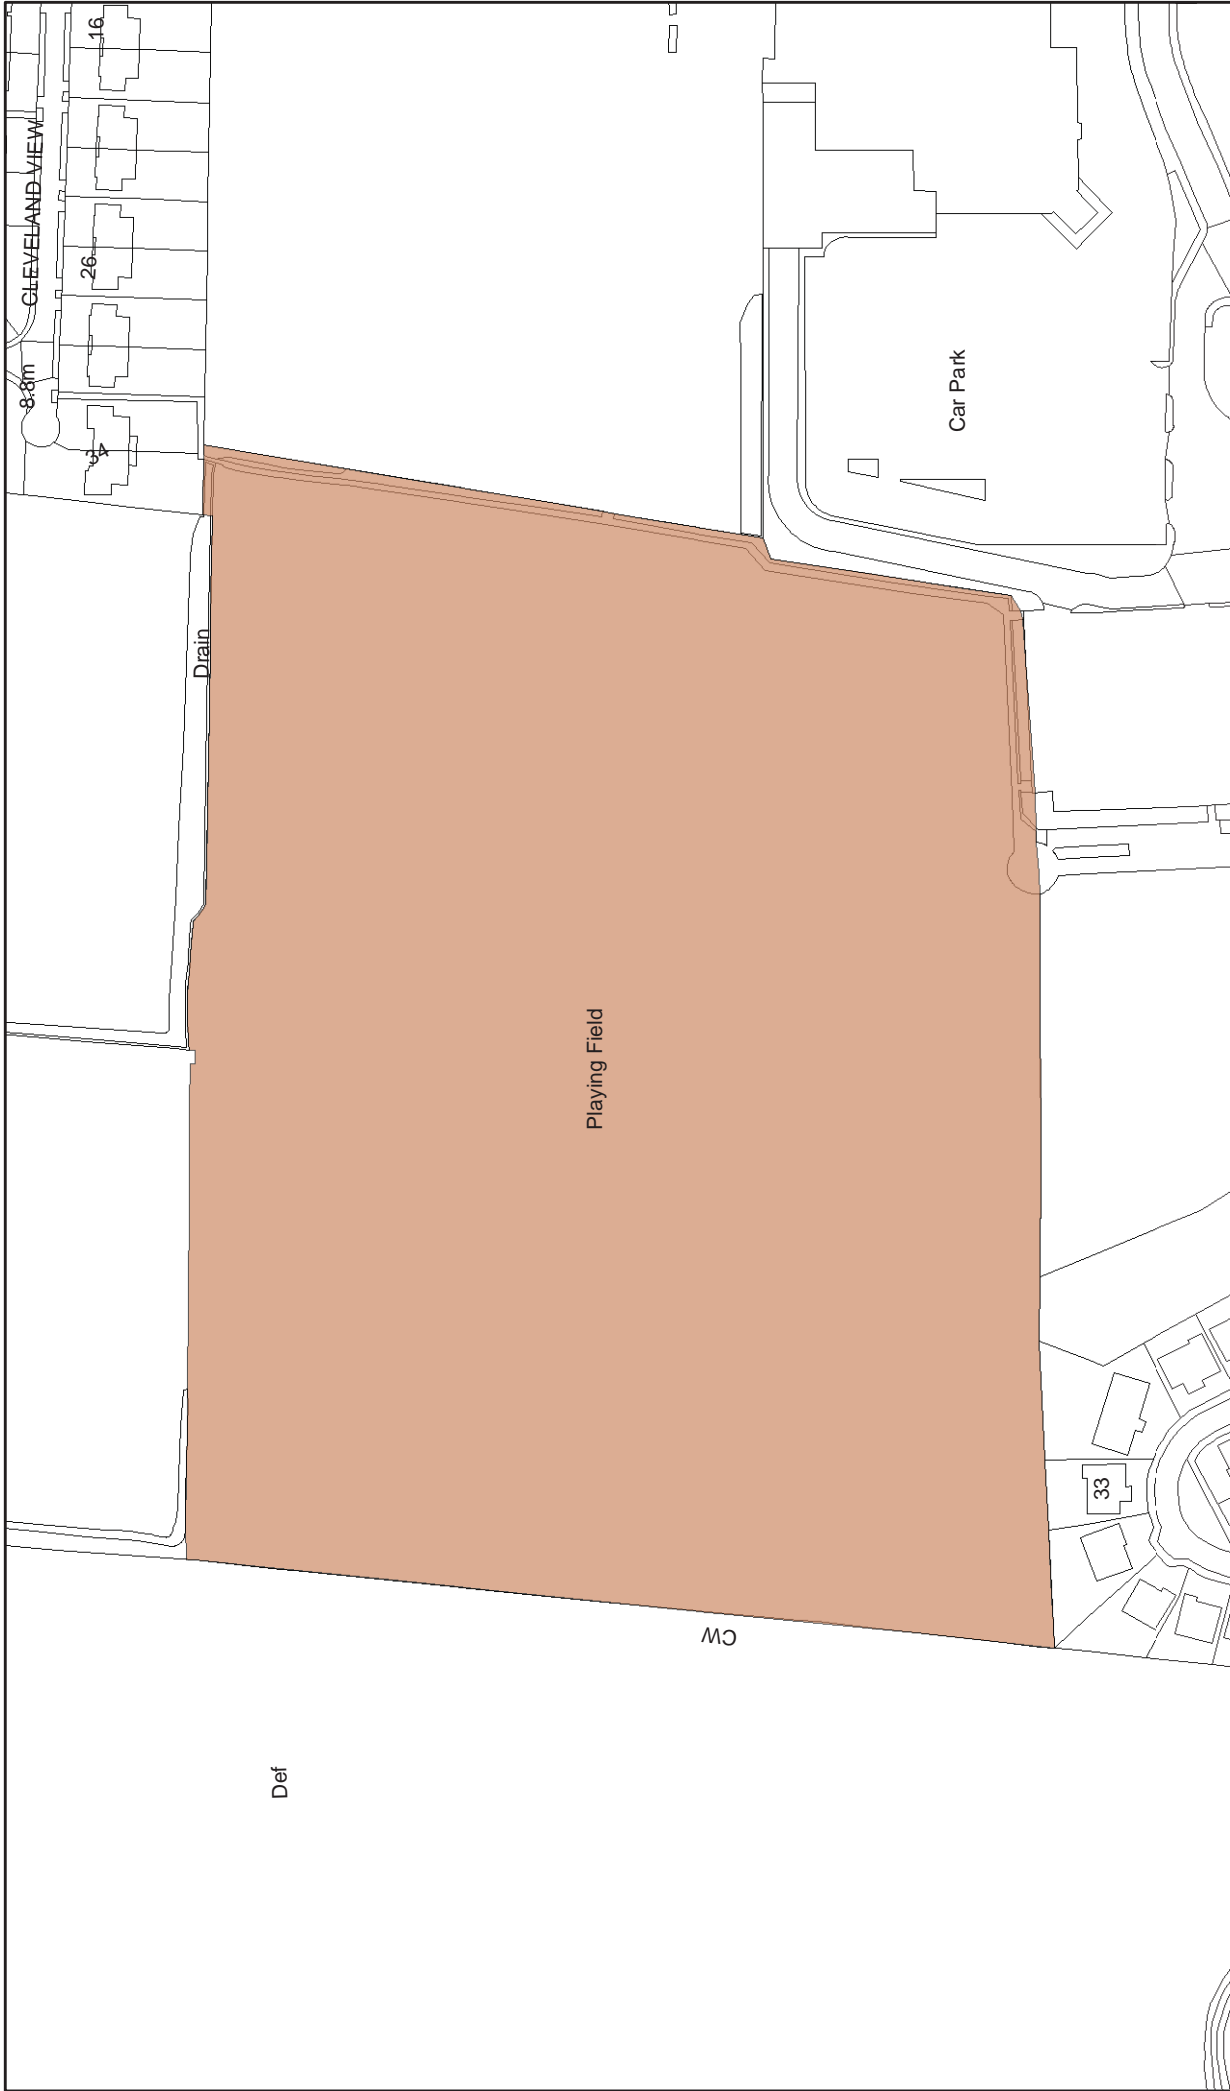

Achievability:

Conclusion on Achievability: Achievable
Comment on Achievability: Viability Assessment Typology: Medium Greenfield 15

Mid to high market value area, with steady rates of recent delivery and high developer interest. Above average prices in immediate area. Site specific considerations (incidence on site of surface water flooding, buffer zone likely required due to proximity to coastal AHLV, HRA, net developable area/yield may be reduced due to proximity to this designation and impact of priority species). Potential abnormal costs from surface water flooding could impact upon the viability of the site

Deliverability

Comment on Deliverability: Subject to appropriate mitigation measures to minimise the impact upon the coastal wildlife corridor, priority species and surface water flooding, this site has the potential to deliver around 10 units in the 11-15 year period.

SHLAA Ref No:	175	Site Name:	Fulwell Quarry East, land at Bell House Road
Subarea:	Sunderland North		
Ward:	SOUTHWICK		
PDL or greenfield:	Greenfield	Capacity:	90
Sieved site?	No	Site area (HA):	4.10
Included in Supply?	Yes	Deliverable/Developable:	11-15 years

Constraints

The site is adjacent to the Fulwell Quarries LNR which is identified as an area of HLV, belonging to the Magnesian Limestone Escarpment. The site lies within 6km of the coastal wildlife corridor and is therefore subject to Habitats Regulations Assessment (HRA). The northern part of the site falls within the Fulwell Quarries LNR boundary. The site forms natural greenspace (part of which is protected as LNR). The whole site forms part of the east-west wildlife corridor that runs between Sunderland and South Tyneside. Much of the site has local archaeological interest in relation to past quarrying activity at Fulwell Quarries. The northern part of the site falls within the Source Protection Zone. Part of the site is affected by 1:30 incidence surface water flooding. Low incidence potential of groundwater flooding. The western part of the site is subject to contamination/land fill.

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: Mitigation required. Greenfield site located on the edge of settlement. The site is adjacent to the Fulwell Quarries LNR which is identified as an area of HLV, belonging to the Magnesian Limestone Escarpment. The site lies within 6km of the coastal wildlife corridor and is therefore subject to Habitats Regulations Assessment (HRA). The northern part of the site falls within the Fulwell Quarries LNR boundary. The site forms natural greenspace (part of which is protected as LNR). The whole site forms part of the east-west wildlife corridor that runs between Sunderland and South Tyneside. Much of the site has local archaeological interest in relation to past quarrying activity at Fulwell Quarries. The northern part of the site falls within the Source Protection Zone. Part of the site is affected by 1:30 incidence surface water flooding. Low incidence potential of groundwater flooding. The western part of the site is subject to contamination/land fill.

Availability:

Conclusion on Availability: Available

Comments on Availability: Council owned site identified for disposal.

Achievability:

Conclusion on Achievability: Achievable

Comment on Achievability:

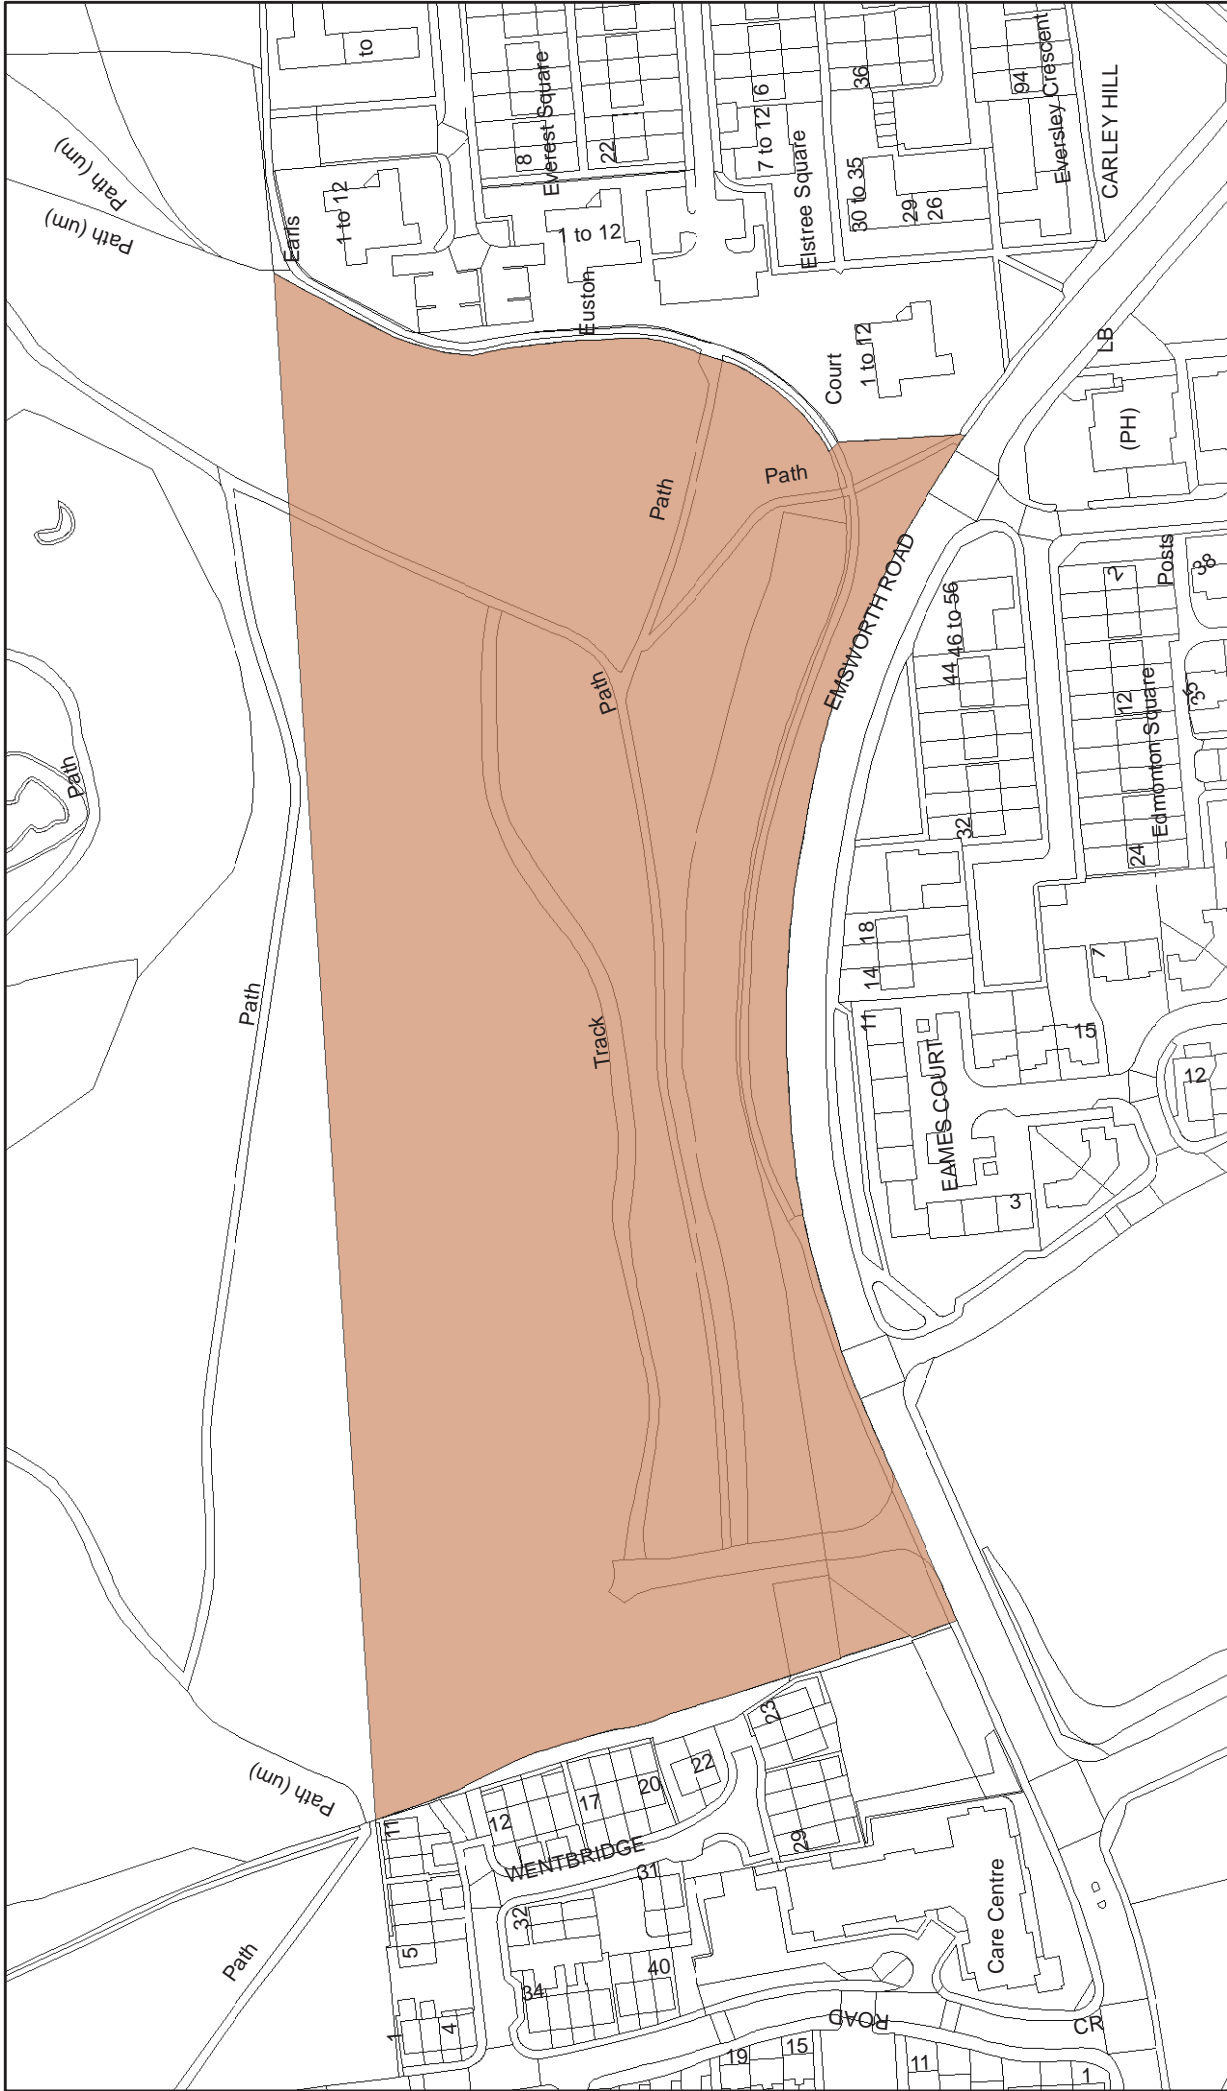

Viability Assessment Typology: Large Greenfield 75.

Low to mid market value area, with steady rates of recent delivery and moderate developer interest. Average prices in immediate area. Site specific considerations (incidence on site of surface water flooding, buffer zone likely required due to proximity to LNR and AHLV, net developable area/yield may be reduced due to proximity to this designation and impact of priority species). Potential abnormal costs from surface water flooding could impact upon the viability of the site

Deliverability

Comment on Deliverability:

Site is suitable for development subject to suitable mitigation measures to safeguard the LNR and AHLV. The site lies within 6km of the coastal wildlife corridor and is therefore subject to Habitats Regulations Assessment (HRA). Council owned site identified for disposal in the longer term.

Assessment Information

Suitability:

Conclusion on Suitability: Suitable
 Comments on Suitability: Site suitability established through grant of planning permission in 2003 for 24 apartments. This permission has since expired.

Availability:

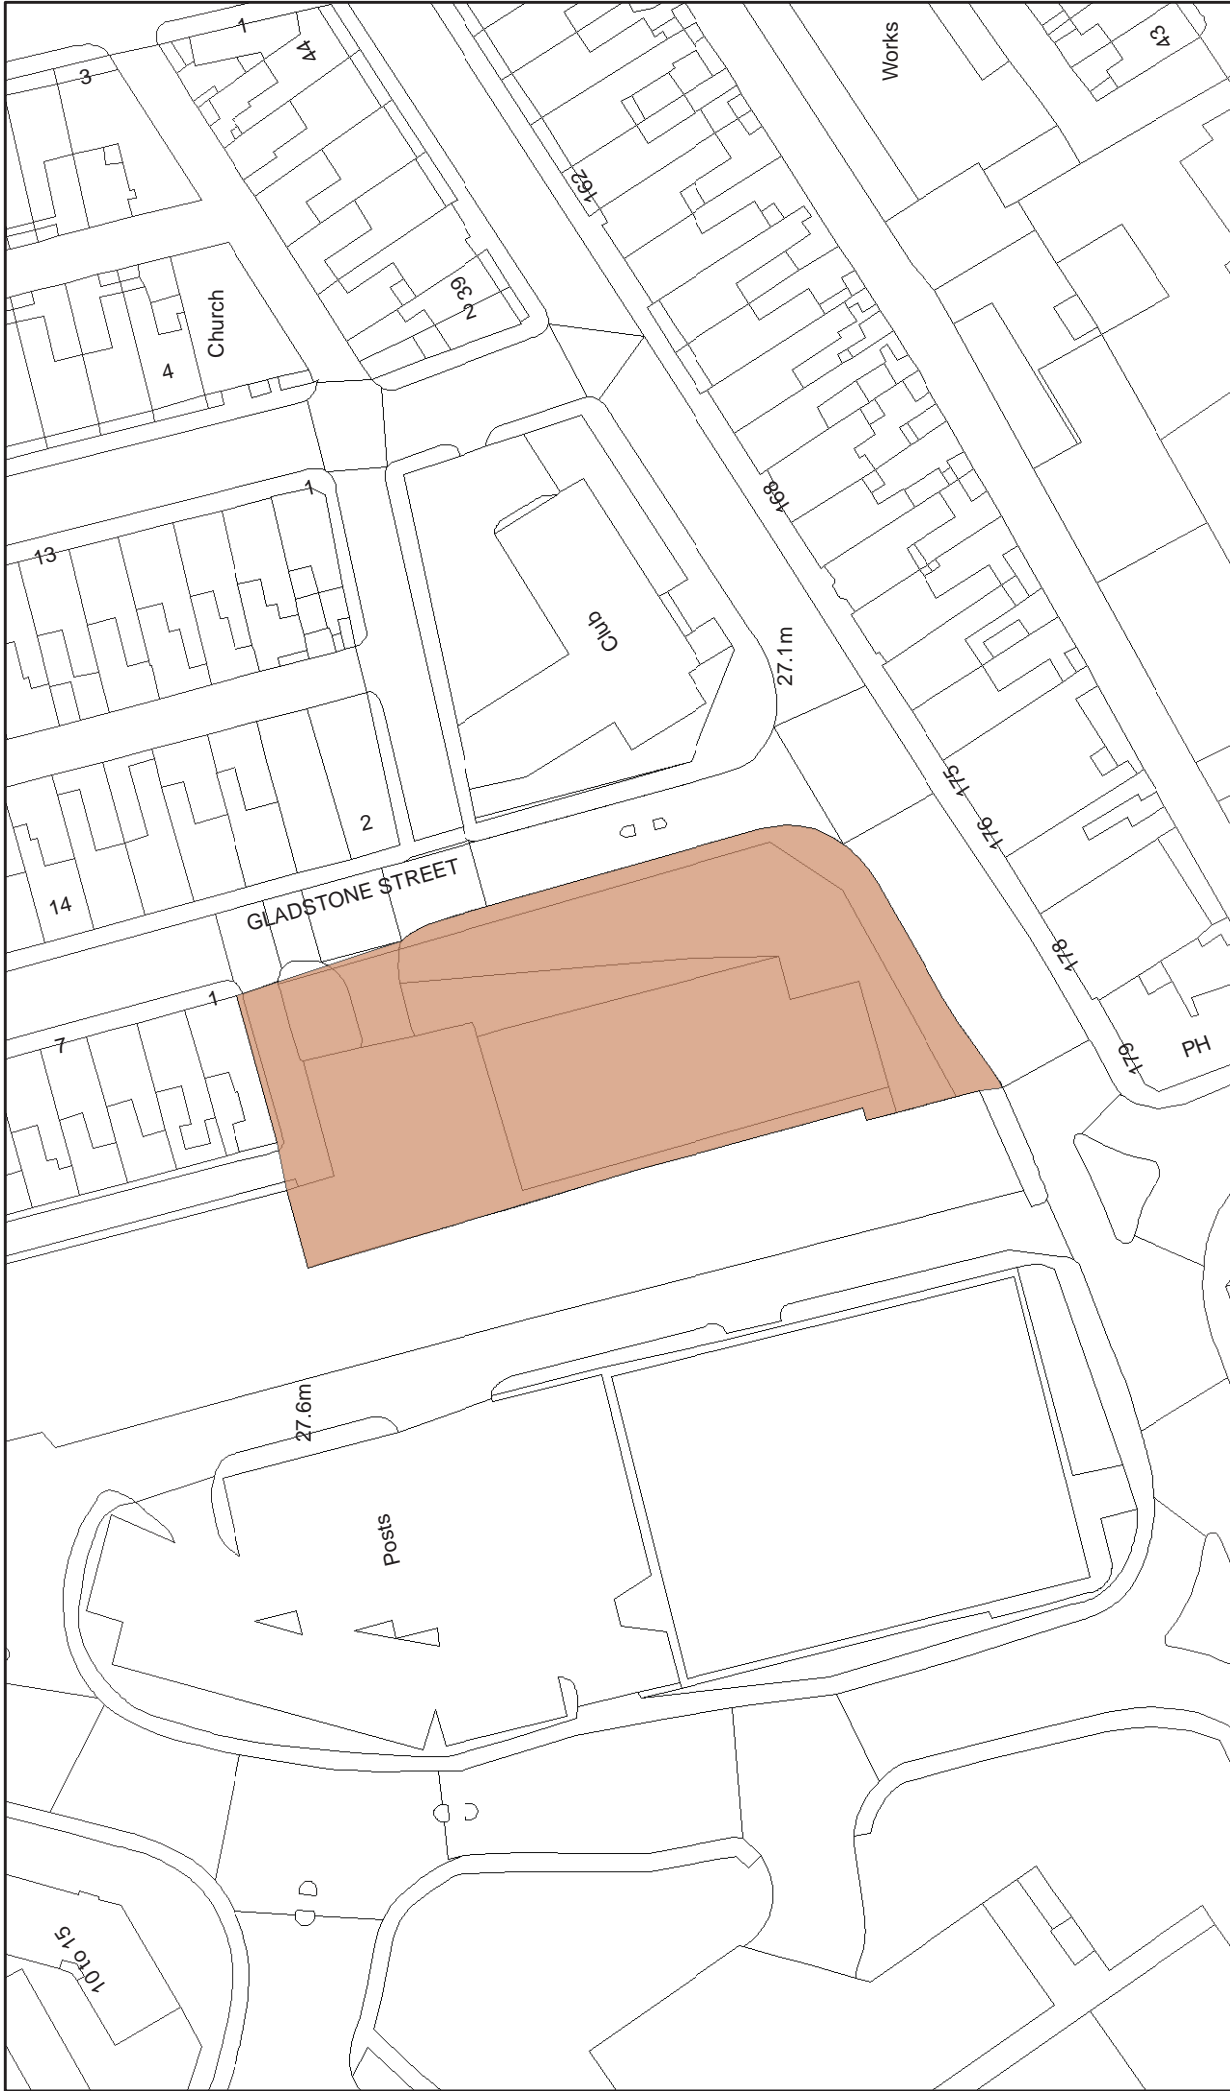

Conclusion on Availability: Not Available
 Comments on Availability: There is a thriving business on the site and the land owner has no intention of developing at this point in time.

Achievability:

Conclusion on Achievability: Not Achievable
 Comment on Achievability: Viability Assessment Typology: Medium Brownfield 25
 Viability Assessment Typology indicates that this typology of site is unlikely to be viable due to associated costs of development on brownfield land, therefore the site has been identified as not achievable at this point in time. There are some constraints effecting the site that may impact on the achievability including groundwater flooding.

Deliverability

Comment on Deliverability: Potential issues with site availability and achievability discounts this site from Sunderland's housing supply at this point in time.

Under Construction: No
 Units Completed: 0

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: Mitigation required. Former school site, approximately 50% greenfield, 50% brownfield. Site lies within 6km of the coastal wildlife corridor and is therefore subject to HRA. Priority species within the vicinity of the site. The western part of the site is affected by electricity pylons. The former school site includes an outdoor sports pitch. School capacity issues.

Site lies within 6km of the coastal wildlife corridor and is therefore subject to HRA. Priority species within the vicinity of the site. The western part of the site is affected by electricity pylons. The former school site includes an outdoor sports pitch.

Availability:

Conclusion on Availability: Available

Comments on Availability: Council owned site identified for disposal

Achievability:

Conclusion on Achievability: Achievable

Comment on Achievability: Viability Assessment Typology: Medium Brownfield 25

Viability Assessment Typology indicates that this typology of site is unlikely to be viable due to associated costs of development on brownfield land. However the site forms part of a masterplan for the wider Sunderland North area and as such the site is considered achievable later in the plan period. There are some issues around access to the site, public transport and pedestrian crossings which are expected to be resolved within the medium term. Also further development in the area will require an increase in school capacity.

Deliverability

Comment on Deliverability:

Site considered suitable, available and achievable in the longer term, subject to overcoming constraints and ensuring adequate school places available, as well as being planned comprehensively as part of the Masterplan.

Assessment Information

Suitability:

Conclusion on Suitability: Not Suitable

Comments on Suitability: Mitigation required. Significant access issues to overcome due to site level differences and limited options off existing residential streets. Within 2km of coast, therefore subject to HRA. The western boundary of the site adjoins a SSSI. Priority species on and in vicinity of site. The site is linked to Fulwell Quarries and the wildlife corridor along the northern city boundary. The 19th Century Fulwell Reservoir is being investigated for potential listing. The site provides natural greenspace and lies on the edge of a Green Infrastructure corridor that connects Fulwell Quarries toward the River Wear and also to the Green Belt north of the city. Low incidence potential of groundwater flooding. School capacity issues.

Availability:

Conclusion on Availability: Available

Comments on Availability: NWL have expressed development potential interest in the site.

Achievability:

Conclusion on Achievability: Not Achievable

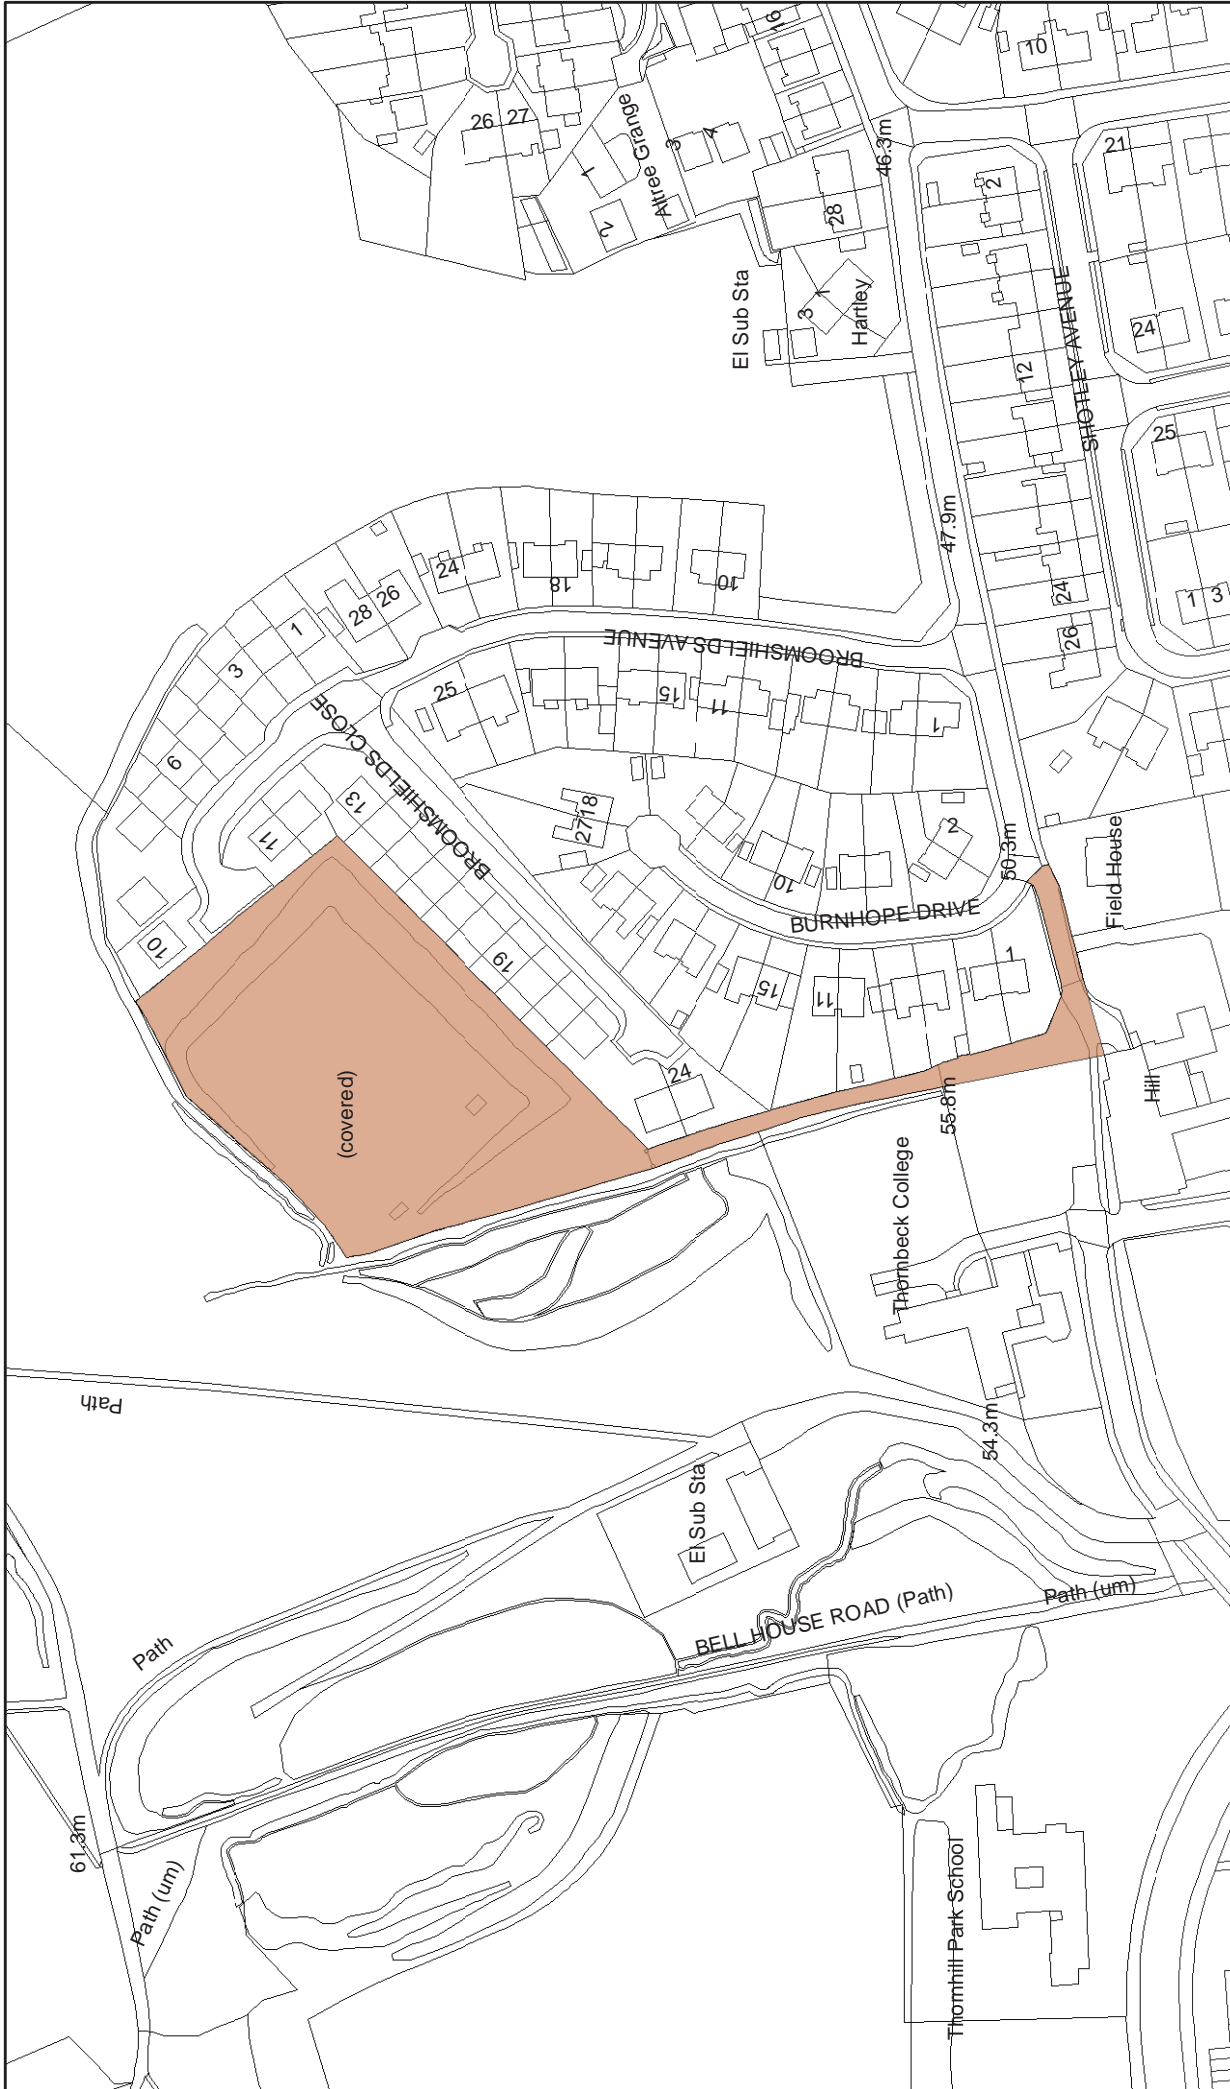

Comment on Achievability: Viability Assessment Typology: Medium Greenfield 15

Viability Assessment Typology indicates that this typology of site is likely to be viable. However, significant site constraints that may effect viability include: access issues and demolition/disposal of existing former reservoir may compromise the viability of the site for such small scale development.

Deliverability

Comment on Deliverability:

NWL have aspirations to take forward an outline application for 20 dwellings. At present the site has significant highways access issues which would require significant mitigation to overcome. In addition the site has extensive biodiversity concerns which would again, require significant mitigation. Significant constraints therefore render the site not suitable for development at this point in time.

Assessment Information

Suitability:

Conclusion on Suitability: Not Suitable

Comments on Suitability: The site is adjacent to the A19 and provides a buffer to existing properties.

The site provides a woodland shelter belt and forms a major part of a narrow Green Infrastructure corridor north-south beside the A19 linking the River Wear to the Green Belt north of Town End Farm. The shelter belt helps to reduce the impact of the A19 on neighbouring properties.

Availability:

Conclusion on Availability: Available

Comments on Availability: No known constraints to site availability at this point in time.

Achievability:

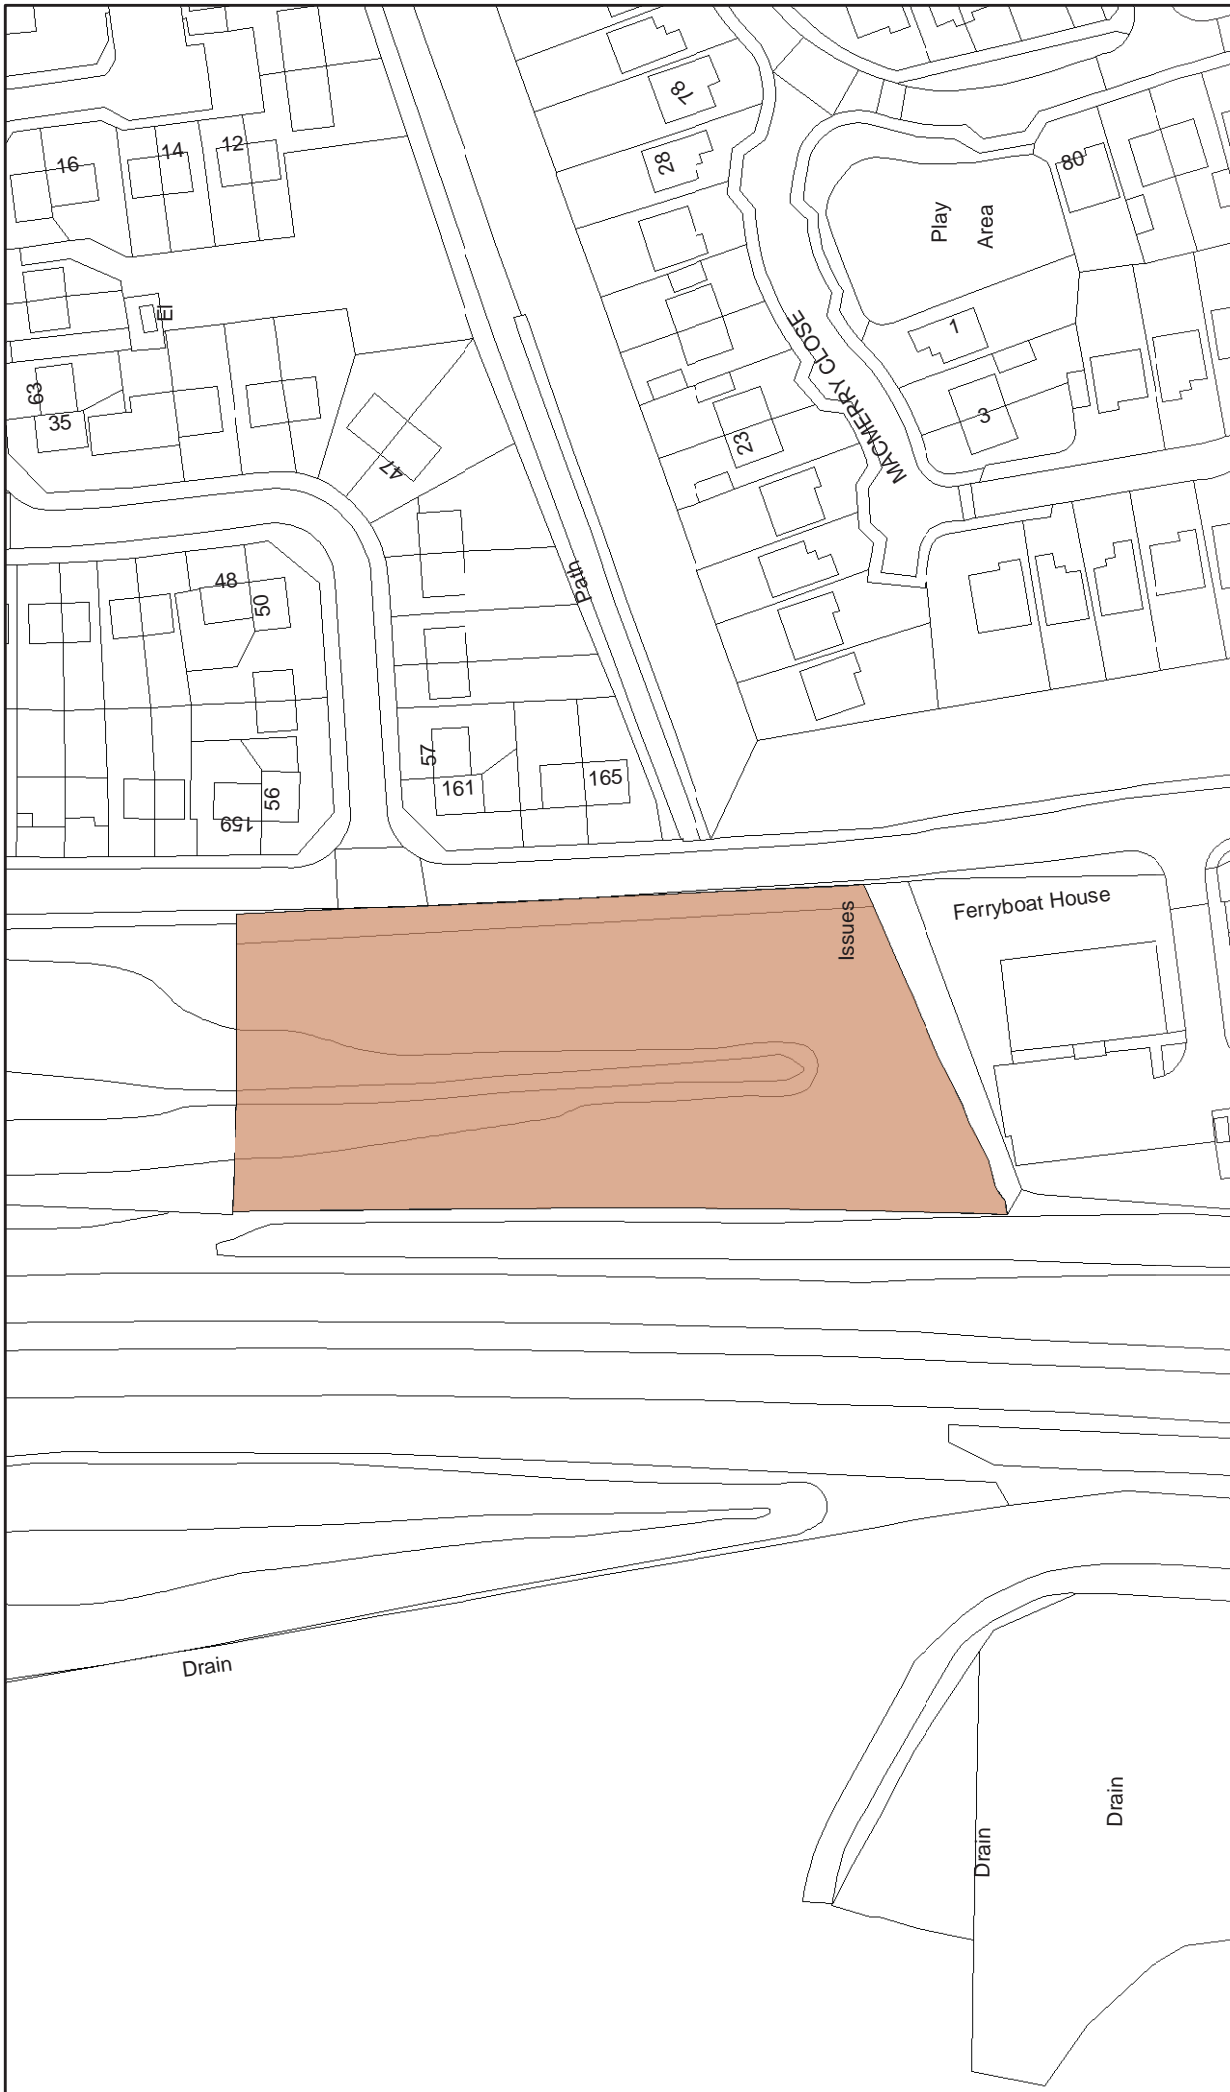

Conclusion on Achievability: Not Achievable

Comment on Achievability: Viability Assessment Typology: Medium Greenfield 15

Viability Assessment Typology indicates that this typology of site is likely to be viable. However, there are some significant constraints on the site that may effect the achievability. There are significant constraints regarding green infrastructure and issues due to proximity to the A19, relating to noise and air pollution.

Deliverability

Comment on Deliverability: Potential issues with site suitability, availability and achievability discounts this site from Sunderland's housing supply at this point in time.

SHLAA Ref No:	413	Site Name:	Seaburn Amusements, Whitburn Road
Subarea:	Sunderland North		
Ward:	FULWELL		
PDL or greenfield:	Mixed (50/50)	Capacity:	279
Sieved site?	No	Site area (HA):	5.65
Included in Supply?	Yes	Deliverable/Developable:	1-5 years

Constraints

EA flood risk zone 3B to the south of the site. Has not been sieved as a category 1 site as appropriate buffer around this zone could be applied- developer submission has demonstrated this. Forms part of the wildlife and GI coastal corridor, therefore subject to HRA. Priority species on and in close proximity of site. Area of high landscape value. Within a Critical Drainage Area with pockets of 1:30 incidence surface water flooding, and the southern part of the site includes Category 1 Flood Zone 3. Low incidence potential of groundwater flooding.

Planning History

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: The site is considered suitable for development and a Stage 2 enquiry is being considered for a mixed use development, including 279 residential units. Mitigation is required. EA flood risk zone 3B to the south of the site. Has not been sieved as a category 1 site as appropriate buffer around this zone could be applied. Forms part of the wildlife and GI coastal corridor, therefore subject to HRA. Priority species on and in close proximity of site. Area of high landscape value. Within a Critical Drainage Area with pockets of 1:30 incidence surface water flooding, and the southern part of the site includes Category 1 Flood Zone 3. Low incidence potential of groundwater flooding. Site size has been reduced due to SFRA.

Availability:

Conclusion on Availability: Available

Comments on Availability: No known constraints to availability at this point in time. Known developer interest to develop around 279 units on the site.

Achievability:

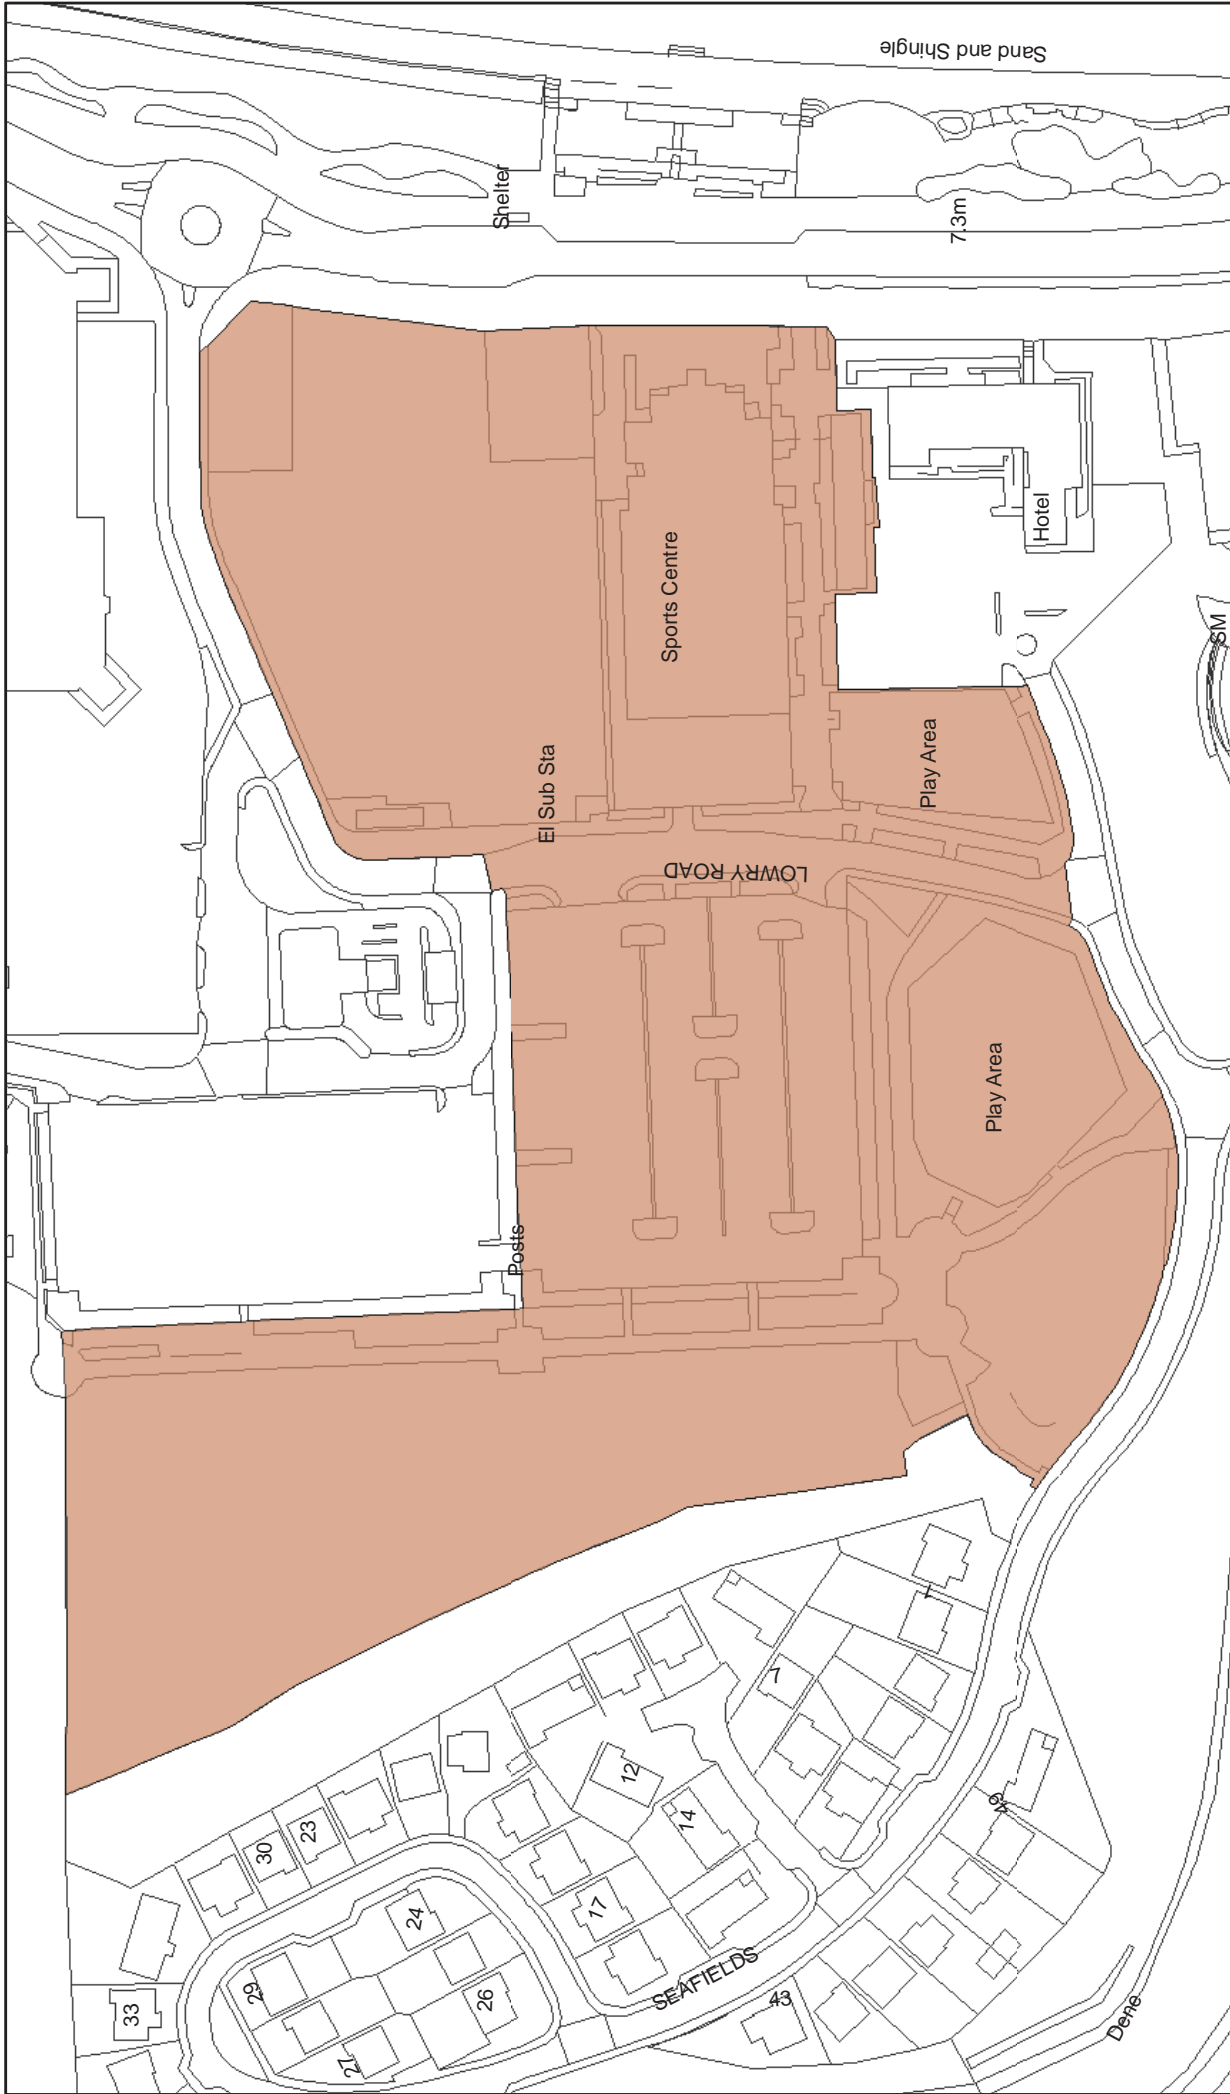

Conclusion on Achievability: Achievable

Comment on Achievability: Viability Assessment Typology: Large Greenfield 175

Mid to high market value area, with steady rates of recent delivery and high developer interest. Above average prices in immediate area. Site specific considerations (incidence on site of surface water flooding and flood zone 3B, buffer zone likely required around flood zone 3 designation and also due to proximity to coastal AHLV, HRA, net developable area/yield may be reduced due to proximity to this designation and impact of priority species). Potential abnormal costs from surface water flooding could impact upon the viability of the site.

Deliverability

Comment on Deliverability: Known developer interest in the site. The site has a hybrid planning application approved with 279 residential units subject to the outline consent. Subject to submitting reserved matters and the implementation of appropriate mitigation measures the site could deliver from year 3 onwards.

SHLAA Ref No:	416A	Site Name:	Land at Ferryboat Lane, North Hylton
Subarea:	Sunderland North		
Ward:	CASTLE		
PDL or greenfield:	Greenfield	Capacity:	80
Sieved site?	No	Site area (HA):	7.79
Included in Supply?	No	Deliverable/Developable:	NCD

Constraints

The site lies within an Area of HLV beside the Magnesian Limestone Escarpment and key viewpoint of the River Wear from the A19 bridge and Claxheugh Rock. Agricultural land quality not known. Within 6km of coast, therefore subject to HRA. The site forms a major section of the River Wear wildlife corridor and priority species have been recorded in the area. The site is situated in close proximity to the Grade II listed Shipwrights PH and has local archaeological importance relating to North Hylton Village. A Public Right of Way passes through the site. Site is partly affected by 1:30 incidence surface water flooding, and has low incidence potential of groundwater flooding.

PDL or greenfield:	Greenfield	Capacity:	60
Sieved site?	No	Site area (HA):	2.19
Included in Supply?	Yes	Deliverable/Developable:	6-10 years

Constraints

Site adjacent to Fulwell Quarries area and is in close proximity to the designated SSSI on site 467c; Impacts of development may require mitigation. The Fulwell Quarries area forms part of the Magnesian Limestone Escarpment and is identified as HLV. Site lies within 2km of coastal wildlife corridor therefore is subject to HRA. The site is linked to the wildlife corridor that follows the northern boundary of the city. Priority species are within close proximity to the area. Local archaeological significance relating to past quarrying and waggonway activity. The site is directly adjacent to Fulwell Acoustic Mirror a SAM and Grade II listed building. 1:30 incidence of surface water flooding occurs on part of the site (<5%) 1 in 100 (<5%) 1 in 1000 (10%). Low incidence potential of groundwater flooding. The site lies within a coal referral area. Former quarrying uses may result in contamination issues on site. Site provides amenity greenspace, natural greenspace and a football pitch. Site forms part of a GI corridor that extends from Fulwell Quarries southwards towards the River Wear.

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: Mitigation required. Site adjacent to Fulwell Quarries area and is in close proximity to the designated SSSI on site 467c; Impacts of development may require mitigation and a buffer zone to the east end of the site. The Fulwell Quarries area forms part of the Magnesian Limestone Escarpment and is identified as HLV. Site lies within 2km of coastal wildlife corridor therefore is subject to HRA. The site is linked to the wildlife corridor that follows the northern boundary of the city. Priority species are within close proximity to the area. Local archaeological significance relating to past quarrying and waggonway activity in the area. The site is directly adjacent to Fulwell Acoustic Mirror a SAM and Grade II listed building which will require mitigation. 1:30 incidence of surface water flooding occurs on part of the site (<5%) 1 in 100 (<5%) 1 in 1000 (10%). Low incidence potential of groundwater flooding. The site lies within a coal referral area. Former quarrying uses may result in contamination issues on site. Site provides amenity greenspace, natural greenspace and a football pitch. Site forms part of a GI corridor that extends from Fulwell Quarries southwards towards the River Wear.

Availability:

Conclusion on Availability: Available

Comments on Availability: Council owned site with willingness to dispose. Wider masterplan for the area is currently being developed.

Achievability:

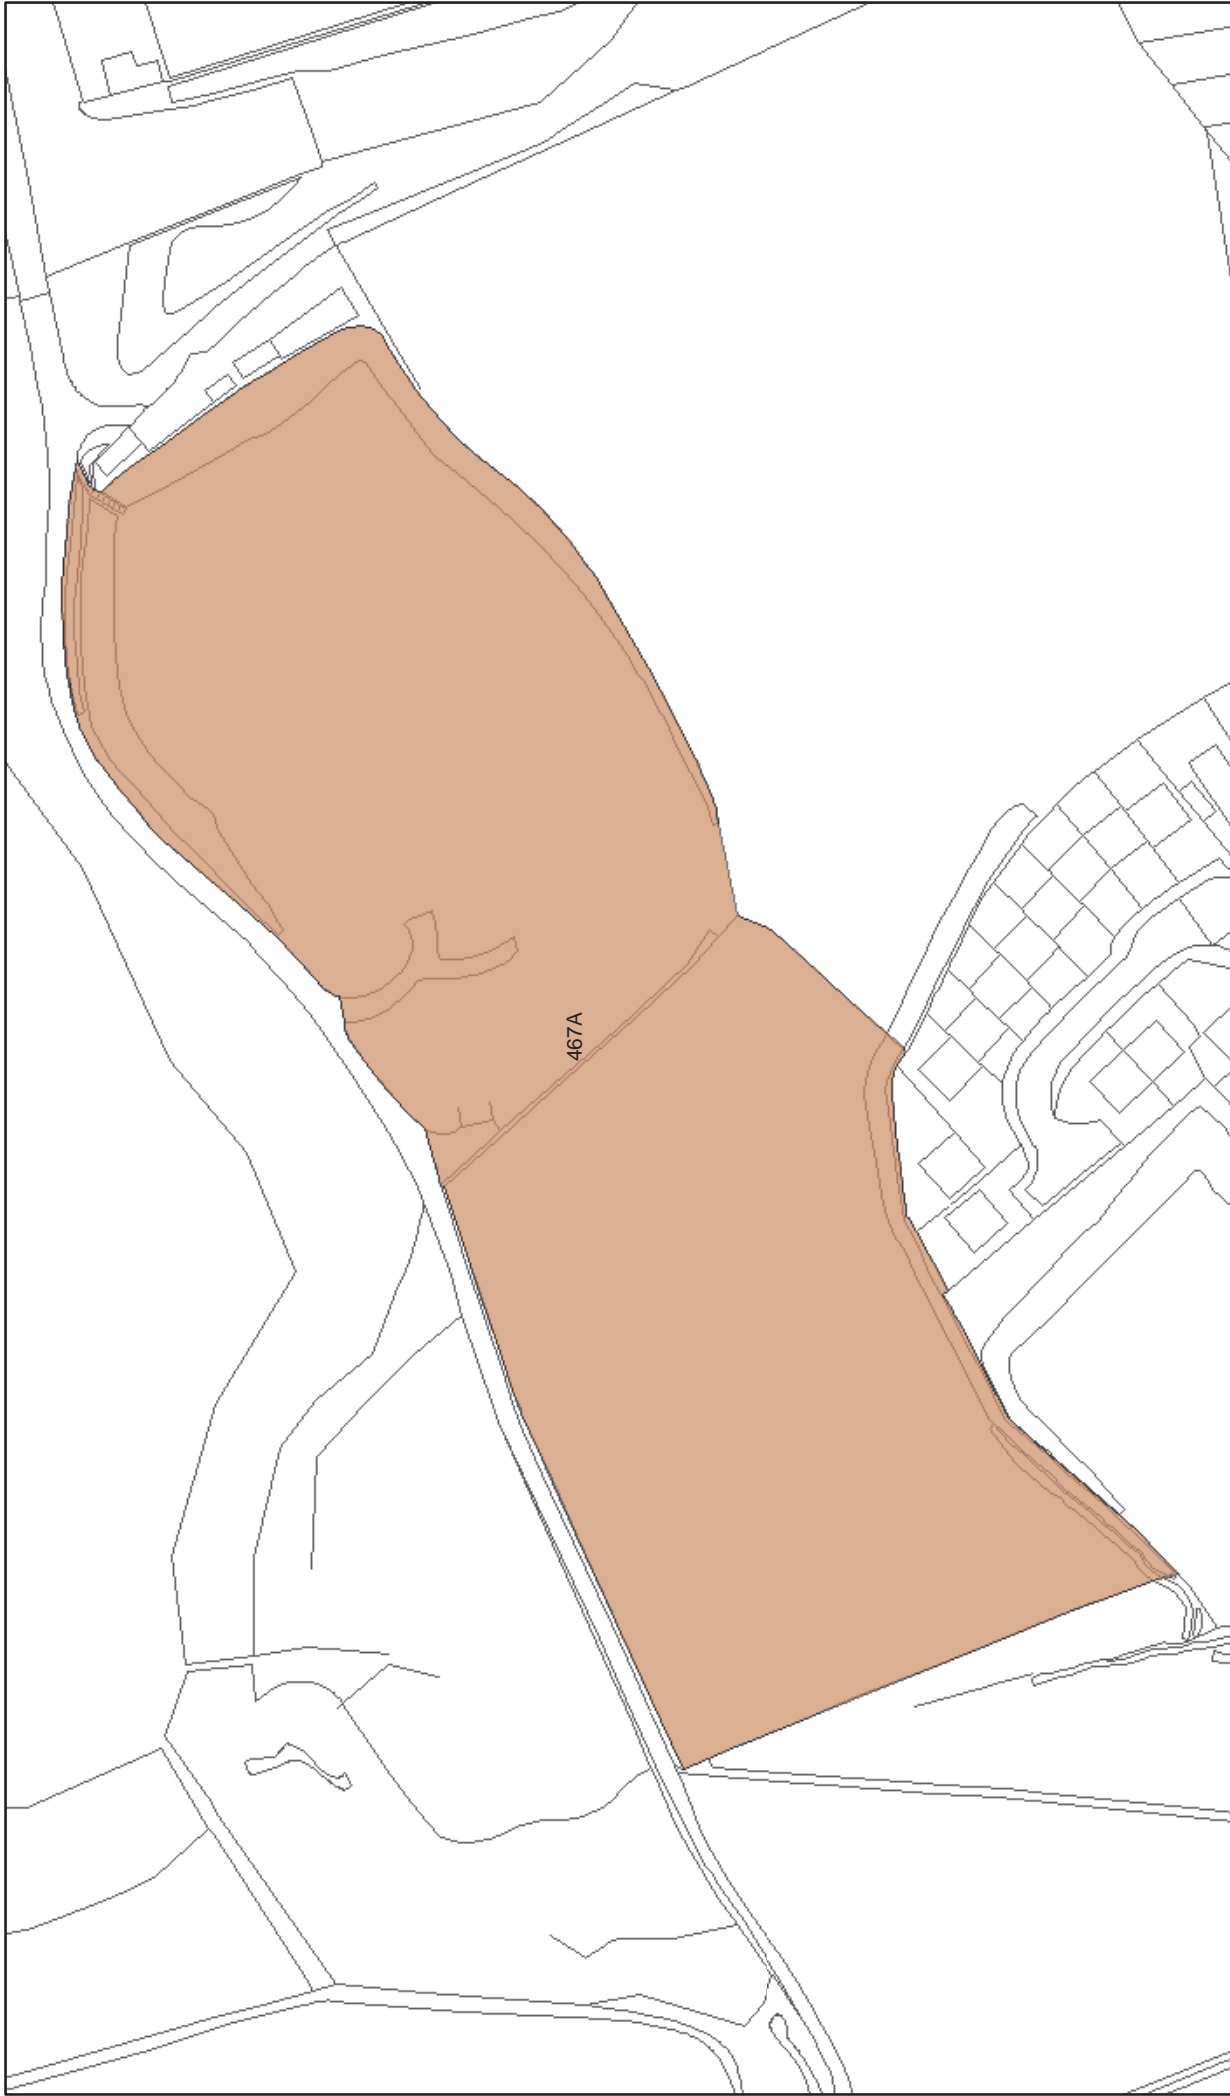

Conclusion on Achievability: Achievable

Comment on Achievability: Viability Assessment Typology: Large Greenfield 75

Low to mid market value area, with steady rates of recent delivery and moderate developer interest. Average prices in immediate area. Site specific considerations (incidence on site of surface water flooding, buffer zone likely required due to proximity to SSSI, SAM and LNR, net developable area/yield may be reduced due to proximity to this designation and impact of priority species).

Deliverability

Comment on Deliverability: The sites suitability will require appropriate mitigation of the SSSI, Fulwell Acoustic Mirror (SAM) and Fulwell Quarries LNR and protected species within the vicinity. Site will also be subject to HRA due to its proximity to the coastal wildlife corridor. A developer has been agreed who is designing scheme out. Sports pitches and access remaining issues in the process of being resolved. Subject to a suitable scheme coming forward and the above issues being satisfied, the site could be expected to deliver around 60 units within the 6-10 year time period.

Under Construction: No
 Units Completed: 0

Assessment Information

Suitability:

Conclusion on Suitability: Suitable

Comments on Suitability: Site within 6km of coast, therefore subject to HRA. Lies partly within a Source Protection Zone. School capacity issues within the area. Site otherwise free from significant constraints.

Availability:

Conclusion on Availability: Available

Comments on Availability: Council owned site identified for disposal. Planning application pending for 10 bungalows. No known constraints to availability at this point in time.

Achievability:

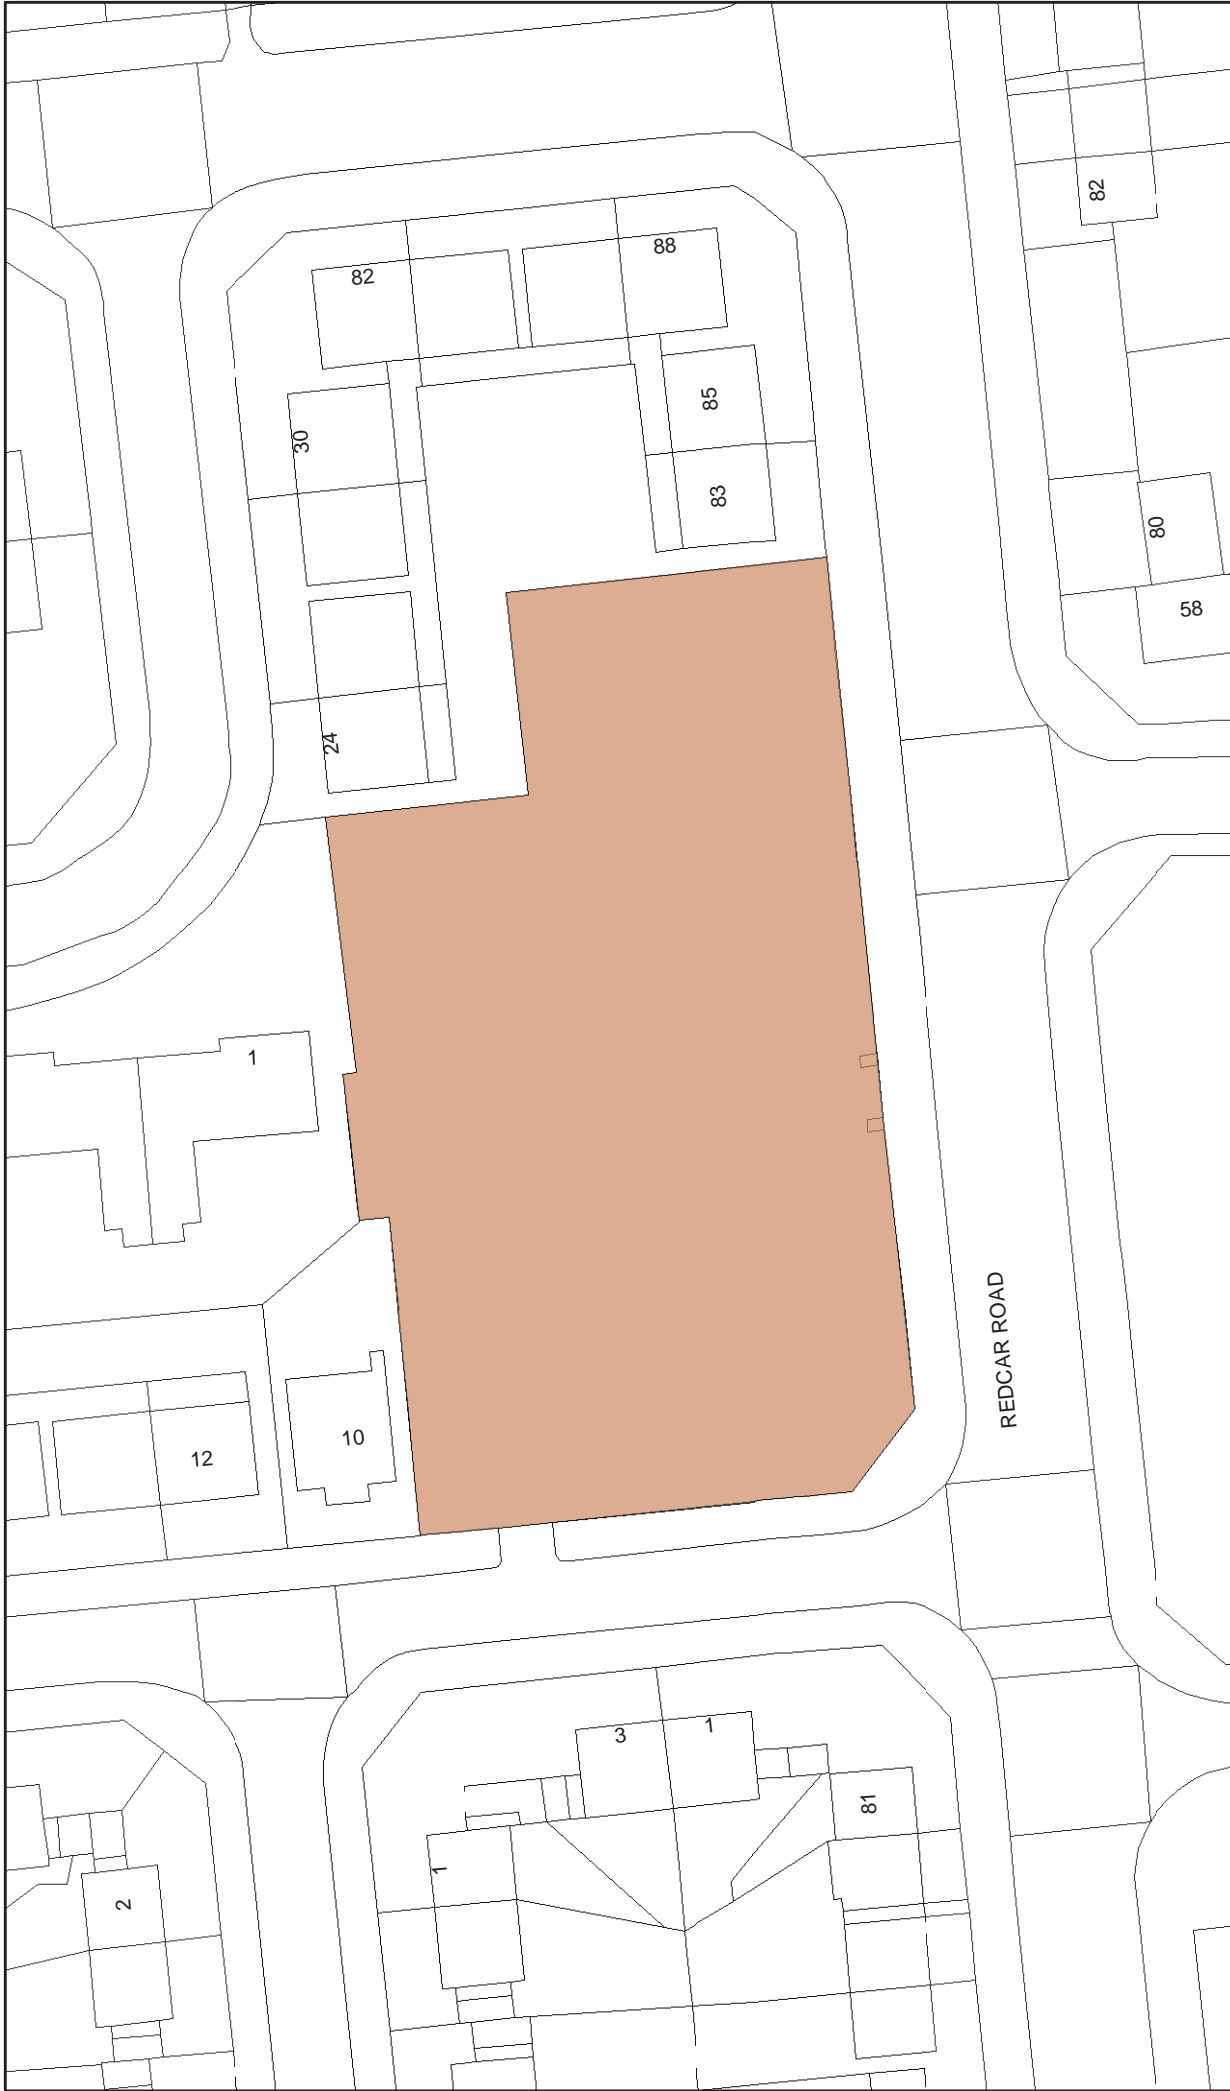

Conclusion on Achievability: Achievable

Comment on Achievability: Viability Assessment Typology: Small Brown 7

Low to mid market value area, with steady rates of recent delivery and moderate developer interest. Site specific considerations (incidence of surface water flooding, mature tree belt provides habitat for bird species, within critical drainage and coal referral area). Abnormal costs may be associated with surface water flooding and coal shafts which may require significant engineering solutions to make the site feasible for housing. Recent interest in the site indicates that despite its constraints, the site is feasible and potentially viable for housing development.

Deliverability

Comment on Deliverability: Council owned site is considered suitable, available and achievable for development. Planning permission granted early 2018. completions expected years 1-5.

 Units Completed: 0

Assessment Information

Suitability:

Conclusion on Suitability: Suitable
 Comments on Suitability: Former Fire Station site (PDL). Mitigation required. Site lies in proximity (under 2km) of the coastal wildlife corridor and is therefore subject to HRA. Site is within historic village of Fulwell. Site within critical drainage area. Access potential from Station Road.

Availability:

Conclusion on Availability: Not Available
 Comments on Availability: TWFRS surplus to requirements. The Fire Station has been relocated.

Achievability:

Conclusion on Achievability: Not Achievable
 Comment on Achievability: Viability Assessment Typology: Medium Brownfield 25.
 Viability Assessment Typology indicates that this typology of site is unlikely to be viable due to associated costs of development on brownfield land, therefore the site has been identified as not achievable at this point in time.

Deliverability

Comment on Deliverability: The former fire station site is surplus to requirements but it is unclear if TWFRS intend to develop the site for housing or market the site in the plan period. Therefore the site is not available for development at this point in time. Viability Assessment Typology indicates that this typology of site is unlikely to be viable due to associated costs of development on brownfield land, therefore the site has been identified as not developable at this point in time.

Assessment Information

Suitability:

Conclusion on Suitability: Not Suitable
 Comments on Suitability: Site not suitable as within designated Green Belt.

Site is amenity greenspace. Site within local wildlife corridor. Previous landfill use to the west of the site may result in contamination issues.

Availability:

Conclusion on Availability: Available
 Comments on Availability: Council owned site with potential for disposal - no known constraints to site availability at this point in time.

Achievability:

Conclusion on Achievability: Achievable
 Comment on Achievability: Viability Assessment Typology: Large Greenfield 75
 Viability Assessment Typology indicates that this typology of site is likely to be viable

Deliverability

Comment on Deliverability: Site not suitable as within designated Green Belt.

Under Construction: No
 Units Completed: 0

Assessment Information

Suitability:

Conclusion on Suitability: Suitable
 Comments on Suitability: Site is considered suitable subject to mitigating against site constraints and retaining a green corridor north/south.

Availability:

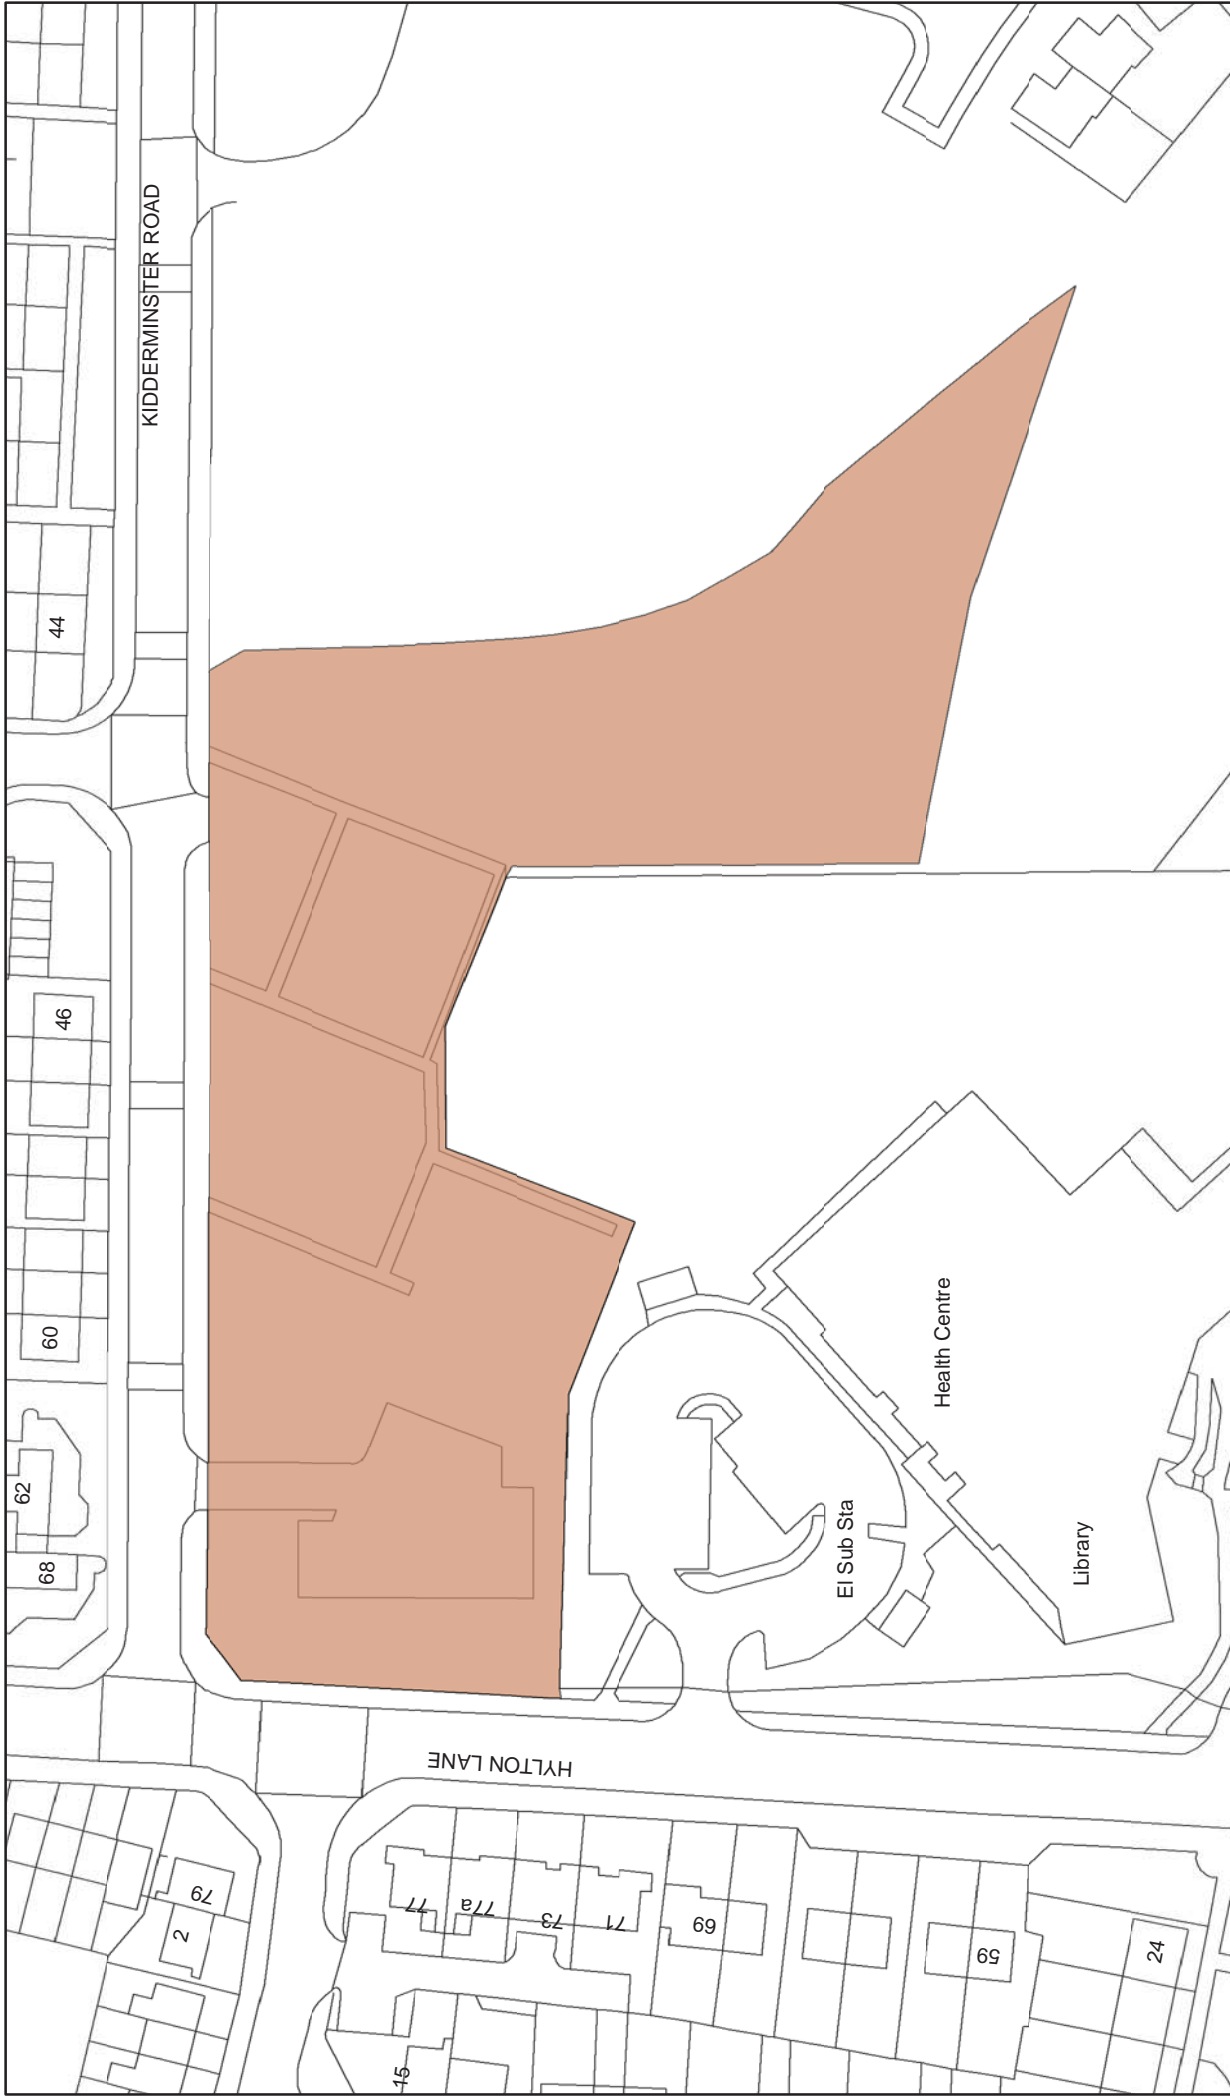

Conclusion on Availability: Available
 Comments on Availability: Site has been put forward by landowner as such considered available.

Achievability:

Conclusion on Achievability: Achievable
 Comment on Achievability: Landowner has recently developed a site to the east of this site and this is the next phase. Considered achievable provided viable when site constraint have been mitigated against, which the landowner suggests they can.

Deliverability

Comment on Deliverability: Site considered deliverable, subject to mitigating for on site constraints and retaining a green corridor through the site, north/south. Planning application anticipated to be submitted for consideration April 2018. As such site considered deliverable from year 6 onwards.

										10

Under Construction: No
Units Completed: 0

Assessment Information

Suitability:

Conclusion on Suitability: Suitable
Comments on Suitability: The site in isolation would have problems with access and amenity and mitigation would have to be put in place due to its backland position. However, the wider area, in conjunction with this site is considered suitable for housing development should a more comprehensive site area be brought forward.As such the site itself is considered suitable, subject to mitigation for the amenity of potential residents, however a more comprehensive scheme would be preferable.

Availability:

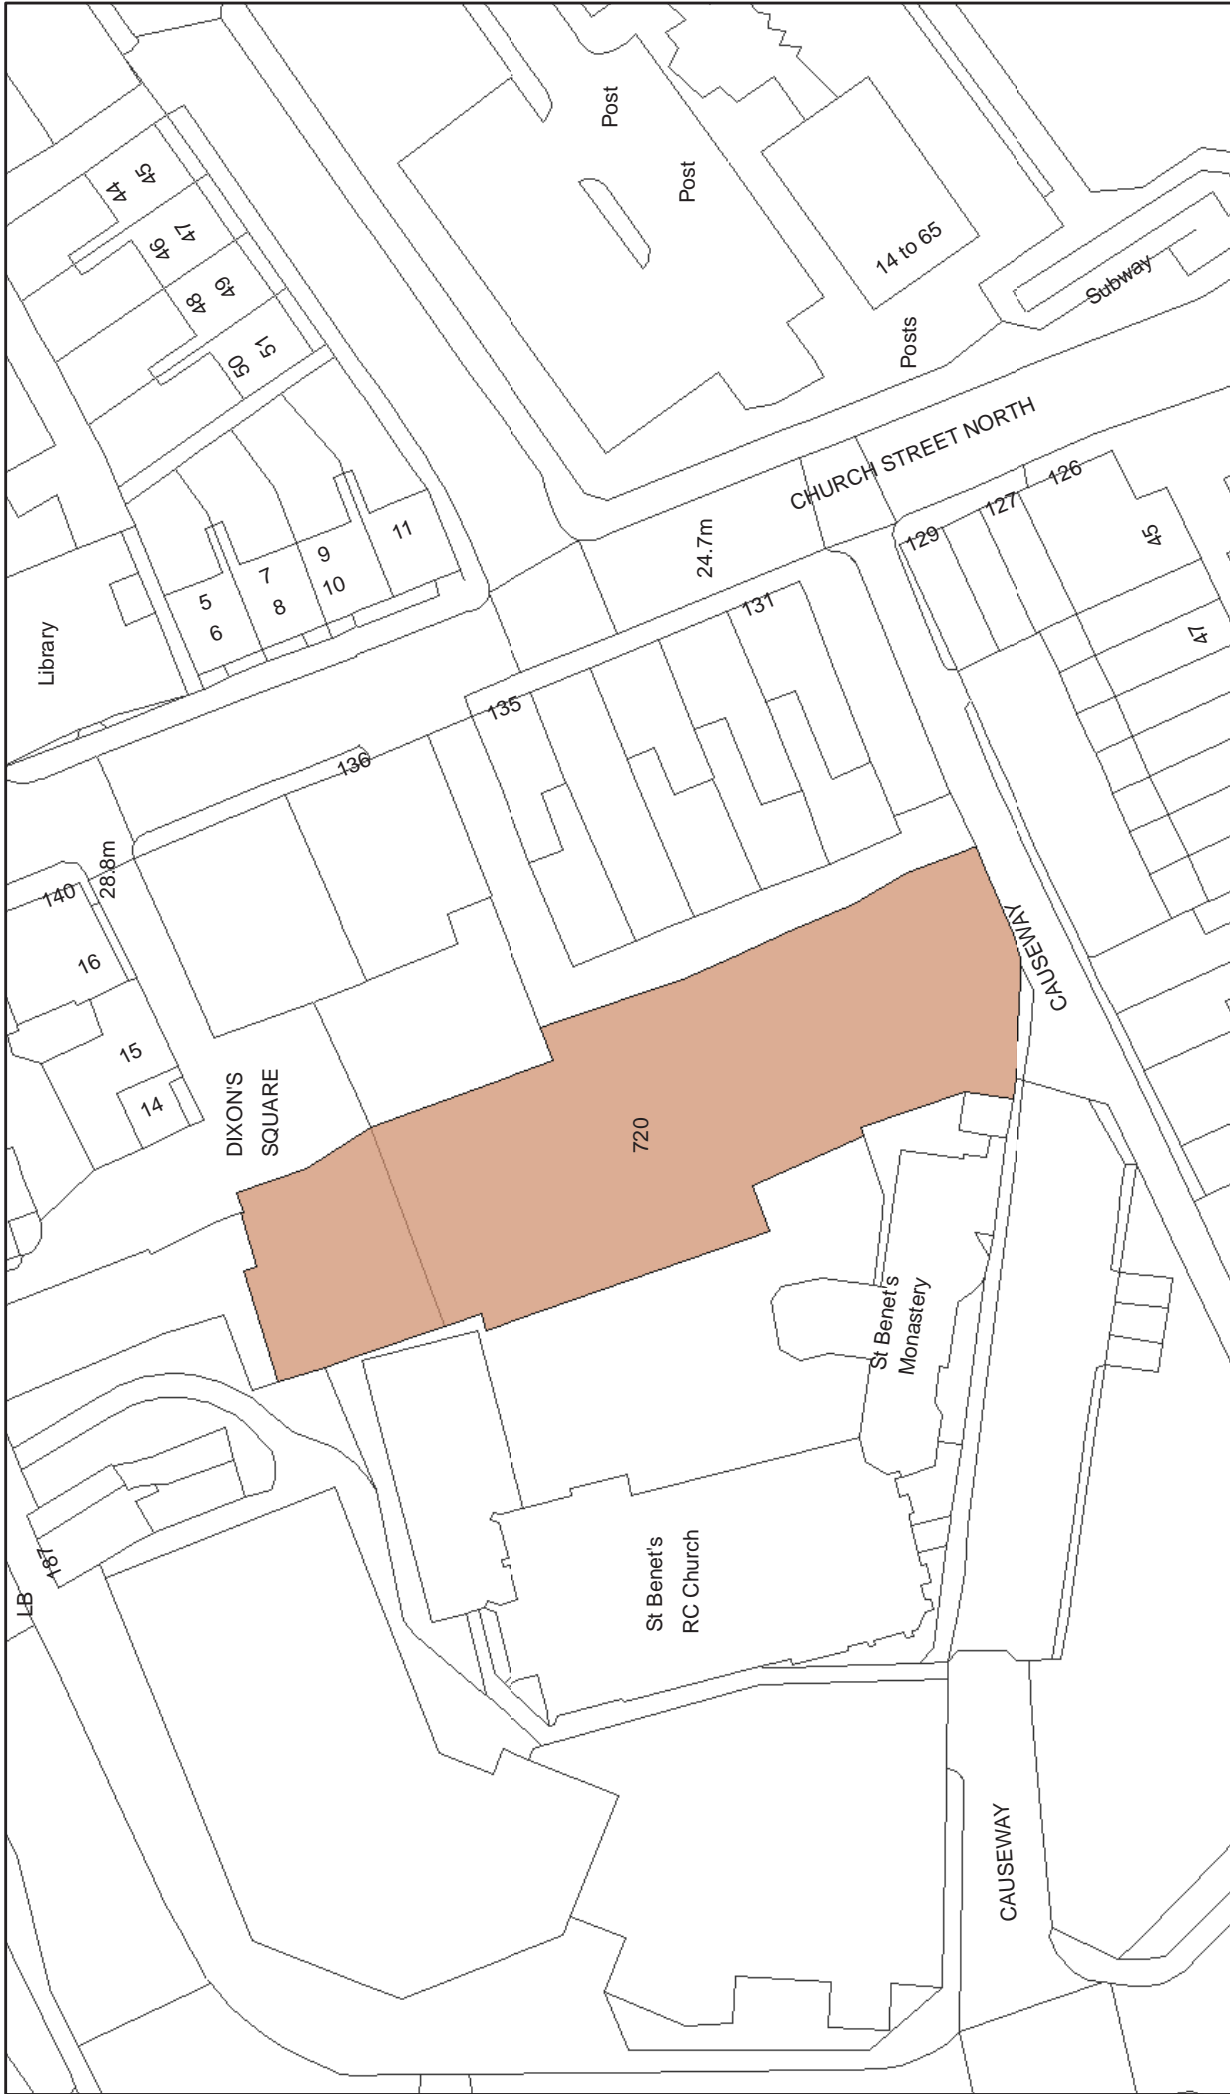

Conclusion on Availability: Available
Comments on Availability: The site is available for development.

Achievability:

Conclusion on Achievability: Achievable
Comment on Achievability: The site is considered achievable but not until a more comprehensive scheme can be brought forward.

Deliverability

Comment on Deliverability: The site is considered develeopbale within the plan period, however not until the 11-15 period, due to the comprehensive planning required to bring forward the wider area. The site is considered to be in a suitable location for housing and regeneration but would need the wider imedmdate area to be brought forward to ensure amenity and access issues can be overcome.
